## **Purpose/Objective**

The City of Vancouver, Washington is updating its comprehensive plan as part of the periodic review process required by Washington's Growth Management Act (GMA). This presentation will provide an overview of Vancouver's approach to overhauling the comprehensive plan and zoning code. In addition to meeting new state requirements, the plan update aims to better address housing needs, respond to climate change, align transportation and land use, and promote equal access to opportunities and essential services.
