

Proposed amendments to the 2023 RTP to reflect the **Montgomery Park Streetcar Extension**

This exhibit documents proposed amendments to the 2023 Regional Transportation Plan to reflect the Montgomery Park Streetcar Extension Project Locally Preferred Alternative endorsed by the Joint Policy Advisory Committee on Transportation and the Metro Council in July 2025.

The amendments are shown in ~~red strikethrough~~ and underscore and include:

- Appendix CC: Montgomery Park Streetcar Extension Project LPA (***new***)
- Chapter 3: System Policies to Achieve Our Vision
- Chapter 5: Our Transportation Funding Outlook
- Chapter 6: Regional Programs Projects to Achieve Our Vision
- Appendix A: Financially Constrained List of Projects and Programs
- Appendix W: Status of current major projects
- Appendix V: Future corridor refinement planning

Metro and regional partners have made significant progress on this project and are ready to take the next step in moving forward into project development and pursuing funding opportunities. To be eligible for federal and state funding, the Locally Preferred Alternative (LPA) must be adopted in the RTP. The requested amendments will bring the Montgomery Park Streetcar Project LPA into the 2023 RTP to support the project moving forward into project development and make the project eligible to compete for federal and state funding opportunities now.

Montgomery Park Transit Project

Recommended Locally Preferred Alternative | September 2024

The recommended Locally Preferred Alternative for high capacity transit to the Montgomery Park Area is streetcar transit with stations at the locations indicated on the attached map, operating as a .65 one-way route mile extension of the existing Portland Streetcar North-South (NS) Line from its existing terminus at NW 23rd Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near the Montgomery Park building in Northwest Portland. This extension will allow the NS Line to operate between the Montgomery Park Building and the South Waterfront. The route extension will operate on NW 23rd Avenue, as well as on a new one-way parallel couplet using NW Roosevelt Street, NW 26th Avenue, and NW Wilson Street.

Montgomery Park Streetcar Extension

In 2019, a Federal Transit Administration transit-oriented development planning grant helped fund the City of Portland's Montgomery Park Area Plan. That plan identified the Montgomery Park Streetcar Extension Project which will extend the existing Portland Streetcar North-South Line 0.65 miles one-way (1.3 miles round trip) from its existing terminus at NW 23rd Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near Montgomery Park in Northwest Portland. In addition to spurring transit-oriented development, the project is intended to serve as a critical single occupancy vehicle trip demand mitigation tool as the area redevelops over time. As such, it also includes improvements to the pedestrian and bicycle network to support non-driving options within, to, from, and through the new district.

The project will support dense, equitable transit-oriented development west of US-30 between NW Nicolai and NW Vaughn streets, where predominantly vacant, low-density industrial land recently underwent land use changes to employment- and housing-focused mixed uses. The project will also support several indirect public benefits for the area through a Public Benefits Agreement between the City of Portland, property owners in the area, and Portland Streetcar, Inc. including new affordable housing, new middle-wage jobs on-site, a new public park, affordable commercial opportunities, and the commemoration of York through public art.

The Portland City Council unanimously endorsed the LPA in December 2024 and as recommended by JPACT, Metro Council also endorsed the LPA in July 31, 2025. Next steps for the project include completing NEPA environmental review, advancing preliminary engineering and design, developing a finance plan, and preparing construction documents. Based on the current timeline, the project is estimated to open in Summer 2030.
