February 2017

Materials following this page were distributed at the meeting.

## Investing in clean water, healthy habitat and nature close to home – for everybody

In greater Portland, nature is part of our DNA. Parks and natural areas provide places to gather, explore, exercise and recharge — no matter where you come from or how much money you make. They attract people and businesses. They protect plants, animals and water.

No wonder voters have laid the foundation for a unique regional park system, with nature at its heart. Over the past quarter century, people have asked Metro to protect clean water, restore fish and wildlife habitat, and connect people with nature close to home across 17,000 acres, from the Chehalem Mountains to the Sandy River.

Despite this remarkable progress, there is more to do. As our population grows and becomes more diverse, we must continue investing to make sure everybody benefits from the setting that makes Oregon, Oregon.

Metro is inviting the community to shape a potential parks and nature bond renewal that voters could consider in 2019. Learn more and tell us what you think.

#### What's next?

**Summer and fall 2018:** Weigh in on priorities and themes.

Fall 2018: Stakeholder group makes recommendations to Metro leaders.

**Late 2018:** Metro Council considers proposed bond framework.

Winter and spring 2019: Community input helps shape project list.

June 2019: Metro Council decides whether to refer bond measure renewal to voters.

**November 2019:** Voters could consider a potential parks and nature bond.

oregonmetro.gov/nature

# Opening the doors to nature, inviting everybody in

As we develop a potential 2019 bond measure renewal, Metro will look for ways to include and serve everybody while fulfilling its parks and nature mission: protecting clean water, restoring healthy fish and wildlife habitat, and connecting people with nature close to home.

Decisions will be shaped by diverse voices — an important step in fulfilling Metro's commitment to eliminate disparities that people of color experience through our policies, programs, services and destinations. Working together, we'll make choices about how to invest in safe, welcoming places to enjoy the outdoors and ensure that everybody benefits from clean water and healthy habitat.

#### What could a bond pay for?

Bond measures pay for capital investments – things you can see and touch. Past investments fall in three main areas, but new ideas are great!

#### Supporting community projects

Metro has supported hundreds of community projects across greater Portland, helping connect people with nature, preserve land and restore habitat. Previous bonds included grants for community organizations and "local share" distributed to parks providers.

*Tell us: How can community projects make the biggest impact?* 

#### Protecting land

Metro protects stream banks, native prairies, wetlands and other valuable habitat – home to rare plants, fish and wildlife. Some properties also provide places to connect with nature or fill key trail gaps. Metro buys land only from willing sellers, at fair market value.

Tell us: What types of land should be protected going forward?

#### Improving parks and natural areas

Capital projects upgrade aging facilities, boost sustainability, enhance safety – and make Metro parks fun and welcoming for 1.6 million visitors each year. Improvements include restrooms, playgrounds, parking and trails. At natural areas, capital projects improve water quality and wildlife habitat.

*Tell us: Which improvements will serve you and your community best?* 

What new ideas do YOU have?

Arts and events Garbage and recycling Land and transportation Parks and nature Oregon Zoo Metro brings people together to shape the future of greater Portland and provides places, services and tools that work best at a regional scale. Led by an elected council, this unique government gives Oregonians a voice in their community.

## Parks and Nature capital bonds: Impact summary

Voters have asked Metro to invest in capital projects to protect clean water, restore fish and wildlife habitat and connect people with nature throughout greater Portland – approving more than \$360 million since 1995.

Thanks to voters, Metro has protected 14,200 acres and counting, from the Chehalem Mountains on the west to the Sandy River Gorge on the east. Hundreds of community nature projects have also received a boost through grants and allocations to cities, counties and park providers. A local-option levy passed in 2013 – renewed in 2016 – helps care for this growing collection of regional parks, trails and natural areas by improving them for visitors, restoring habitat and engaging the community.

The Parks and Nature System Plan, approved by the Metro Council in February 2016, lays out Metro Parks and Nature's mission and role, the status of Metro's portfolio today, and strategies to guide the future. Additionally, the Strategic Plan to Advance Racial Equity, Diversity and Inclusion, adopted by the Metro Council in June 2016, identifies racial equity as a core priority for all Metro programs, policies and investments.

#### Protecting high-quality natural areas - 14,200 acres and counting

The combined footprint of the land protected by Metro through fee title or conservation easement would cover an area the size of approximately 17 additional Oxbow Regional Parks. Regional acquisitions have protected more than 100 miles of stream and river frontage – the distance from Portland to Eugene. Additionally, the Metro Council has directed nearly \$30 million to capital investments in new nature parks and regional trails designed to connect people to nature close to home.

Local parks, trails and natural areas - more than \$84 million invested from capital bonds

A portion of bond funds are distributed on a per capita basis to cities, counties and park providers to fund local acquisitions, restoration projects and trail and park improvement projects. More than 800 acres have been protected by local government partners, many in close-in urban areas. More than 200 local projects support a growing network of parks, trails and natural areas, serving residents where they live.

#### Nature in Neighborhood grants – impacts greater than the projects themselves

After nine rounds of awards, capital grants have supported nearly 60 projects with goals as diverse as restoring salmon habitat on Johnson Creek and turning an alley into a park in Cornelius. Grant recipients and partners have reported outcomes that benefitted local neighborhoods and built capacity within underserved communities, in addition to achieving the program goals of protecting water quality and wildlife habitat, increasing the presence of nature in urban neighborhoods and connecting people to nature.

#### Independent community oversight

Established by Metro Council as part of the 2006 bond, the Natural Areas Program Performance Oversight Committee gives the region an outside review of how Metro invests the region's 2006 bond measure and increases transparency and accountability.

PARKS AND NATURE RACIAL EQUITY, DIVERSITY AND INCLUSION ACTION PLAN 2018-2022 EXECUTIVE SUMMARY

# Creating an equitable parks and nature system

Metro's parks and nature mission is to protect clean water, restore fish and wildlife habitat and provide opportunities for people to experience nature close to home. Thanks to two decades of voter investments, Metro manages more than 17,000 acres of parks, trails and natural areas across every community in greater Portland – from Chehalem Ridge on the west to the Sandy River Gorge on the east, from Blue Lake and Smith and Bybee Wetlands on the north to Graham Oaks on the south.

The Parks and Nature Racial Equity, Diversity and Inclusion Action Plan brings together parks and nature's mission with Metro's commitments to improve racial equity in the region. The document sets down dozens of specific actions parks and nature will undertake over the next five years to increase racial equity, diversity and inclusion in its work and at its sites.

These actions strive to make sure people of color feel safe and welcome when they visit Metro parks and natural areas. Others will create job training and mentoring for people of color so parks and nature's workforce looks more like the people it serves. Several actions build on past work to serve greater Portland's Native American community and their use of cultural resources on Metro properties.

Throughout the plan, the actions build the systems and the culture required to make racial equity how parks and nature fulfills its mission.

Download the parks and nature action plan: oregonmetro.gov/equity

## Metro recognizes racial equity as the backbone of good governance to ensure the success of everyone

Metro acknowledges that people of color across the region experience the most disparate outcomes in nearly every category of social well-being including housing, transportation, access to nature, education and health. Metro has identified racial equity as its strategic direction to eliminate the disparities that people of color experience (regardless of race or background) especially in areas related to Metro's policies, programs, services and destinations. Focusing on racial equity will result in all people in the region having the opportunity to thrive in all aspects of social well-being.

The Strategic Plan to Advance Racial Equity, Diversity, and Inclusion directs all Metro departments to develop equity action plans to achieve Metro's five strategic goals through the department's programs, services, projects and plans. Parks and nature's plan illustrates the department's commitment to Metro's racial equity strategy through actions that make racial equity how the department does business.

Parks and nature director Jon Blasher with staff.

#### Five strategic goals to achieve an equitable and prosperous region

The Strategic Plan to Advance Racial Equity, Diversity, and Inclusion identifies five long-term goals to direct Metro in creating specific objectives, actions and measures of evaluation and accountability as the agency works to help greater Portland reach an equitable and prosperous future.

#### Goal A

Metro convenes and supports regional partners to advance racial equity.

#### Goal B

Metro meaningfully engages communities of color.

#### Goal C

Metro hires, trains and promotes a racially diverse workforce.

#### Goal D

Metro creates safe and welcoming services, programs and destinations.

#### Goal E

Metro's resource allocation advances racial equity.

## Desired outcomes and 12 objectives

**Economic equity:** Communities of color prosper economically from the business of parks and nature in greater Portland.

**Environmental equity:** Communities of color in greater Portland enjoy the benefits of conserving land, air and water and equitable access to safe and welcoming parks, trails and natural areas.

**Cultural equity:** People of all cultures, races and traditions connect with nature and with one another in the region's parks and nature system.

#### **Goal A objectives**

- Contribute to increasing the diversity of people and perspectives in the conservation movement
- Plan the regional system of parks, trails and natural areas with a racial equity lens

#### **Goal B objectives**

- Strengthen internal communications, transparency and accountability
- Meaningfully engage communities of color in policy and investment decisions
- Honor Indigenous and community connections to land

#### **Goal C objectives**

• Invest in continuing education and inclusive staff culture

• Build career pathways for youth and communities of color

#### **Goal D objectives**

- Deliver relevant and inclusive programs and services for people of color
- Manage and operate a safe and inclusive system of parks, natural areas and trails

#### **Goal E objectives**

- Build department capacity for equitable community engagement and partnerships
- Remove barriers for people of color in contracting and grant programs
- Equitably plan for and invest in Metro's and the region's system of parks, natural areas and trails

#### The power of partnerships

From designing parks to teaching youngsters to fish to restoring habitat through traditional ecological knowledge, partnerships with organizations led by people of color have become important for many parks and nature projects. The racial equity action plan calls for even greater use of partnerships, moving from discrete projects to institutionalizing partnerships as the norm for parks and nature.

Partnerships with community organizations have been key to parks and nature developing the knowledge, systems and capabilities it needs to implement this plan. As a government committed to advancing racial equity, it is important to listen to the diverse needs of our communities and create opportunities for community voices to drive parks and nature's work.

Whether a partnership removes barriers to accessing decision makers or develops programs that reflect a specific community or cocreates policies, programs and processes that improve racial equity, a broad spectrum of partnerships allows for an exchange of knowledge and builds access and understanding for community and staff alike. It's important work that we have to take on individually and collectively.

What gets me excited is seeing the small successes people have... People see that this isn't some big magical or mystical work.

It's about treating people with respect and integrity and acknowledging and addressing historic wrongs.

– Jonathan Blasher, parks and nature director

## A staff-led plan

More than 30 staff members from across parks and nature came together to create this plan. These staff members led their work teams in discussions and reviews of the plan throughout the process.

The plan relies on staff's clear understanding of the parameters and possibilities of their jobs and community members' clear demands for what racial equity, diversity and inclusion look like. It lays out the specific actions needed to build the systems, the culture and the accountability required to establish institutional racial equity in parks and nature.

The vast majority of the plan's actions came from people of color in the region and from the department's staff – the people the plan is made to benefit and those who will implement it.

## A living plan

This plan is a living document. Throughout its five years, the plan will be reviewed, adjusted and improved regularly in partnership with community members. New opportunities will appear and new directions will need to be taken, and the plan is built to make those changes.

Madelyn Joe runs the trails at Mount Talbert Nature Park.

During a picnic at Oxbow Regional Park cohosted by the Immigrant and Refugee Community Organization and Metro, a young visitor gives Metro nature educator Renee Robinson a high five.

## Change is already underway

Even as the action plan was being created, parks and nature staff continued and started projects that placed racial equity front and center. The examples and lesson from these projects influenced and became part of the racial equity plan.

Here are examples from the past few years:

- In collaboration with greater Portland's Native American community, Metro developed a culturally appropriate process for Native Americans to access land for cultural events, culturally significant plant material harvesting or ceremony space.
- Nature in Neighborhoods grants redesigned its criteria for 2018 to reflect the action plan's three racial equity outcomes: economic, environmental and cultural equity. Staff provided examples to applicants from past grants that met the criteria and worked with the review committee to use racial equity as it evaluated grants.
- Parks and nature changed its contracting practices so that it hired more minority-owned businesses for nature restoration projects.
- The Connect with Nature program created a model of partnering with community organizations to plan future parks that better serve people of color.

#### Hello, we're Metro.

Metro brings people together to shape the future of greater Portland and provides places, services and tools that work best at a regional scale. Led by an elected council, this unique government gives Oregonians a voice in their community.

#### **Parks and nature**

Metro protects clean water, restores fish and wildlife habitat, and connects people to nature across 17,000 acres of parks, trails and natural areas – and the Oregon Zoo.

#### Land and transportation

Metro plans for new homes, jobs, transportation options and access to local businesses and parks.

#### **Garbage and recycling**

Metro manages the garbage and recycling system and is a resource for information about safe disposal and ways to reduce waste.

#### **Arts and events**

Metro runs the Oregon Convention Center, Portland Expo Center and Portland'5 Centers for the Arts.

#### Metro Parks and Nature Potential Bond Measure

## Stakeholder Table decision-making protocol 9/19/18

#### **Table Purpose**

Guided by community needs and a commitment to advancing racial equity, make recommendations to Metro's Chief Operating Officer regarding a potential 2019 Parks & Nature bond measure to protect and connect nature and people.

#### **Participation Guidelines**

- Participate in the spirit of negotiation and open communication.
  - Stay on agenda.
  - Seek to learn and understand each other's perspective.
  - Encourage respectful, candid and constructive discussions.
- Participate without dominating.
  - Treat each other with dignity and respect.
  - Provide a balance of speaking time -- share the air, let others speak once before speaking twice.
- Keep things transparent.
  - Silence could be construed as acceptance. Advisory table members agree to fully
    participate in decision-making by sharing feedback and opinions with the facilitator and
    each other at meetings and between meetings.
  - Discuss topics together rather than in isolation.
  - Make every effort to avoid surprises.
- Seek to resolve differences and reach consensus.

#### **Decision Making Protocol**

- The advisory table group will make decisions on recommendations to Martha Bennett, Metro's Chief Operating Officer.
- The group will work toward consensus. Consensus is the point at which all members can support the decision as the most viable choice for the group as a whole, although it may not be everyone's personal favorite.
- If the group cannot reach consensus, majority and minority opinions will be noted and communicated on the group's final set of recommendations to Metro's COO. It will be noted how many people expressed these points of view, to accurately capture the opinions of the stakeholder group.
- Decisions will be frozen unless a majority of the committee feels that a decision needs to be revisited, or unless the committee has, at the time of the original decision, identified the action as tentative until further issues are resolved.

Completed by: Mary Rose Navarro

#### Audience overview:

Metro staff partnered with 10 community organizations to engage people of color and people from other historically marginalized communities. It is important to engage with this community to determine their priorities for protecting water quality, restoring habitat and connecting people to nature — and how racial equity can be advanced through bond investment.

Approximately 90 people participated. The focus of the outreach was everyday people who might have a wide variety of interest and experiences with parks, nature or the outdoors. Besides the cohort of community members discussed below, only a few of the participants were staff of community organizations.

#### **Engagement format:**

Two community forums were hosted on Saturday, Sept. 22 in Hillsboro and on Wednesday, Sept. 26 in Milwaukie. The forums were 3 ½ hours long and included meals, stipends and child care. There was a Spanish-speaking table at each forum where presentations were interpreted simultaneously and discussions happened in Spanish.

The forums introduced participants to the potential ways that bond funding could be invested through 10 stations that included general descriptions of the work, examples and images. Each station was staffed, and participants had 45 minutes to visit the stations and learn about the work. They were then given an opportunity to answer three questions in facilitated table discussions. The questions were:

- What stations jump out as having the greatest benefits to you, your family and your community?
- How can we bring more benefits to communities of color and other historically marginalized communities?
- Which stations should we do less of in order to achieve greater outcomes in others? Why?

After a break the participants learned about the local share and capital grant portions of the previous bond measures and discussed a fourth question at their tables:

• How can local share and capital grant criteria be improved to assure the funding supports communities of color and other historically marginalized communities?

#### **Engagement point people:**

Metro staff leading this effort included Mary Rose Navarro and Laura Oppenheimer.

A cohort of community people helped shape the forum agenda and materials. They also were responsible for outreach and paying the stipends to participants. The cohort included:

- Todd Struble/Brandon Cruz from APANO
- Alejandra Ruiz from the Portland Harbor Community Coalition

- Danielle Jones from Kairos PDX
- Malin Jimenez from Verde
- Mariana Valenzuela from Centro Cultural
- Sadie Atwell from the Coalition of Communities of Color
- Surabhi Mahajan from Friends of Trees
- Micah Meskel from Portland Audubon
- James Holt from Confluence Environmental Center
- Neil Schulman from North Clackamas Urban Watershed Council

#### Key priorities identified for potential bond measure:

Many forum participants observed how interconnected the work is. Therefore, while this report does indicate priorities, it's important to note that participants particularly valued the opportunity to invest bond funds in a way that can achieve the most outcomes.

Due to the interconnected nature of this work, participants had many questions and concerns even within the priorities that emerged. Their comments shed light on the complexity of achieving racial equity through bond investments.

Three priorities emerged due to the <u>personal</u> benefits to communities of color and other historically marginalized communities.

#### Provide access to nature in underserved communities

"What should we do to better know nature? Having parks closer is better to get knowledge first and connections. This can lead to later going further out."

- Existing parks need to be improved with a variety of park amenities.
- Purchasing additional land, including small parcels, that are closer to where people live.
- Research where park deficiencies exist and how bond money can be directed there.
- Recognize the need to find balance between access and preservation of nature.
- Consider the potential of displacement, the need for transportation.
- Community engagement will make sure projects will actually strengthen communities.

#### Protect culturally significant lands

## "This section is very important because if it is a huge focus, then it will cover other areas such as, protects streams and riverbanks"

• Support for this station depends on who decides what culturally significant lands are, where they are located and who will have access to the lands. An important reflection in this approach is to ask how Metro ownership of culturally significant lands will differ from government ownership of land during colonization.

#### Improving existing parks

"Before we go to new areas, let's improve what we have. This work allows us to build the good will to then go on doing new projects."

- Take care of existing parks before investing in new parks
- Improve existing parks to make them welcoming and provide access to all communities of color
- Emphasis on improving ADA accessibility

#### • Provide enough parking spaces

- Blue Lake Park needs many improvements
- Improvements that can extend use into the winter, such as year-round structures with heaters
- Do major restoration projects in our existing parks
- Concerns were expressed about transit access and park fees

Communities of color and other historically marginalized communities identified another top priority due to its importance for overall community and ecosystem health, although they did not see the same immediate, direct personal benefits.

#### Protecting stream and river banks

"Water is life. Benefits of clean, healthy water and rivers benefits everyone — flora, fauna and humans."

"Make sure no one hurts nature." Spanish-speaking participant

- The importance of clean water was widely expressed. There was recognition that stream restoration affected fish, animals and humans; that erosion could impact this food chain; that restoration can reduce flooding.
- Restoration goes hand-in-hand with protection. Restoration of streams and river banks is a bigger issue than Metro. Work should be done in partnership with other agencies.
- Restoration work can be linked to the preservation of culturally significant land and Indigenous communities should be closely tied to this work

Local share and capital grants

- Conduct impact assessments for projects that include housing, transportation and access.
- Providing access to nature in communities of color should be a local share criterion.
- Prioritize projects that engage and partner with culturally-specific and other historically marginalized communities
- Develop metrics to assess the ability of the local share program to advance racial equity
- Require local share and grant-funded projects to be open to the public without a fee
- Ensure that parks are kept clean and maintained

#### Key concerns identified about potential bond measure:

#### Gentrification

"Yes I want everyone to have access, but do local parks lead to gentrification and pricing people out? Add programs that help keep people in place."

- Concern about displacement was discussed. While communities of color and other historically marginalized communities need access to nature due to the stress of their everyday lives, they are worried about increasing property values and rents.
- Parks and nature bond investments need to coincide with other anti-displacement measures.

**Regional investments** 

• There was strong feedback that nature-based recreation only benefitted specific groups of people and did nothing to advance equity

Local share and capital grants

## Potential parks and nature bond measure

#### Community forum engagement | Fall 2018

- Local share agencies don't consistently demonstrate a commitment to racial equity
- There's a lack of follow up and accountability

#### Key themes on racial equity:

"I think a big one is access. From physically getting to a place, to knowing it is there, to having amenities. Community engagement will drive success."

- Identify where historically marginalized communities need nature parks and work with members of diverse communities to address the need.
- Evaluate risks of fire, landslide, floods and other such events that could impact historically marginalized communities. Use this to inform bond investments.
- Community members need to be involved in the decision-making through design, construction and maintenance of the park.
- Conduct an impact analysis before moving forward on any new park development to consider social and economic opportunities as well as environmental impacts.
- New park improvements need to build the community's capacity to participate in decisions regarding their neighborhoods.
- Construction of park and natural area improvements need to contribute to the economic vitality of culturally specific and other historically marginalized communities including working with COBID firms, and hiring and training a local workforce.
- Work closely with transportation agencies to make sure parks are accessibility by transit.
- Do not increase park fees.
- Providing resources for houseless communities to be in nature in a more habitable way, affordable camping, access to restrooms

#### Areas of disagreement within this audience:

- While there was support for filling in trail gaps along Marine Drive and completing the Columbia Slough trail, many other people questioned whether trails should be a priority. Supporters were looking for hiking opportunities and places to ride with family. Many supported trails that connected people to natural areas and parks. However, there was less support for providing biking opportunities for fast cyclists with spandex.
- While many participants wanted to focus on taking care of existing parks and making them more accessible, there were also participants who felt that creating a vision for new parks (like at Chehalem Ridge) was a great model and would serve the community for generations.
- Major restoration, particularly projects tied to rivers and streams, was widely supported. People questioned whether bond investments should focus on completing restoration projects on land we already owned before acquiring new land for these major project.

#### Suggestions for future engagement with this audience:

There were many comments about providing information about the places where people can camp, hike and be in nature. There were suggestions for free tours and excursions, programming in different languages and providing transportation.

#### Questions

- How set is local share? What if we take local share out of the bond?
- Why do the criteria differ between local share and capital grants? Why can't they be the same?

## • Can the newly forming Parks and Nature Equity Advisory Committee play a role to apply equity analysis to local share projects?

- Do we believe local share supported equity, or did it create displacement? Can an equity analysis of local share projects be done?
- Can you buy options contracts with land owners that aren't ready to sell but may soon?
- Could there be mandates about a community-informed process?

Completed by: Alice Froehlich

#### Audience overview:

Metro staff engaged with members of Portland Parks Native American Community Advisory Council (NACAC). NACAC members are Indigenous community members and represent numerous organizations and tribes. It is important to engage with Indigenous community members because they have a close relationship to some of the ancestral and ceded homelands that Metro stewards. Portland has the ninth largest urban Indigenous population in the United States. The Indigenous community in Portland is very diverse, with over 390 tribes and bands represented, and Oregon is home to nine federally recognized tribes. Although the community is diverse, there are some shared values about the importance of clean water, healthy land, safe harvest, ceremony spaces and land management practices.

#### **Engagement format:**

Metro staff held three small group meetings; each meeting was four hours long. Initially there was one small group meeting planned, but the community requested the two additional meetings. In addition to the small group meetings there was one one-on-one meeting.

#### Engagement point people:

- Alice Froehlich, lead
- Rosie McGown, administrative support

#### Key priorities identified for potential bond measure:

The key priority for this community is changing systems of who is in power and who has access, in order to be more inclusive of people of color and other historically marginalized groups.

- Land acquisition criteria priorities:
  - Protect Indigenous culturally significant land (request for cultural resource assessment conducted with Indigenous persons)
  - Protect salmon, steelhead and lamprey
  - Protect culturally significant native plants
  - Protect groundwater, stream and riverbanks to support healthy water quality and resilient communities
  - Protect spaces that show rarity, that reflect the relative diversity of an ecosystem or possesses unique natural features
- Capital project criteria priorities:
  - Infrastructure for the rejuvenation of cultural practices
  - Projects that will benefit the indigenous community, such as gathering spaces or access to water, safe access for elders and children
  - Projects that prioritize underserved communities
  - o Low impact access improvements
- Local share and grant program priorities:
  - Priority given to projects initiated and led by culturally specific organizations to ensure meaningful relationship between the grantee and the community the grant intends to serve

## Potential parks and nature bond measure

#### Indigenous community engagement | Fall 2018

- Support community-based projects that develop a relationship with the land and being able to harvest and eat from the landscape
- o Education opportunities to access science in a way that is culturally relevant and significant
- Focus on providing access to STEM for at-risk or historically marginalized youth and that promote environmental career pathways by engaging older youth and teens
- For the culturally significant sites that fall within the jurisdiction of local share, Metro should require cultural competency or cultural responsibility among local share recipients, working with the Indigenous community to define competencies and practices.
- Projects that improve soil quality, reduce and eliminate toxins in our landscape

#### Key concerns identified about potential bond measure:

Support the leadership and work of historically marginalized communities; don't have white dominant culture lead for them.

- Concerns around who is involved in the engagement for the potential bond, as well as who is involved in the future implementation of the bond. Money needs to be set aside to engage communities of color; people of color often can't engage because of a lack of resources. Engagement is expensive but it is a wise, long-term investment. There also needs to be a class-informed lens: engage vulnerable communities throughout every stage of planning and implementation.
- Gentrification
  - How to make it easier for low-income community members to access nature close to home without creating another avenue for gentrification
  - Looking at gentrification intergenerationally, considering both where communities are now and where communities are being pushed out to
  - Intersection with the housing bond, inclusion of natural areas zoned to allow for affordable housing on site or prioritizing close proximity of affordable housing to access to nature
- How will this bond address honoring the Indigenous sense of time and space, ensuring a longevity point of view rather than prioritizing short-term success
- Concerns about purchasing land and building project with the goal of "recreation." Any new recreation should be low-impact and culturally significant, prioritize underserved communities, and not conflict with indigenous cultural values
- Concern about who does the work that bond dollars are spent on: engaging COBID companies and helping those companies build capacity to take on an increased workload.
- Providing resources for houseless communities to be in nature in a more habitable way, affordable camping, access to restrooms
- Climate change

#### Key themes on racial equity:

Separating out racial equity as a distinct bullet point demonstrates the issue; this should be imbedded in all aspects of the bond development and work at Metro, not just viewed as a box to be checked. Equity needs to be included throughout the whole system, and reflected in who is making decisions and who is benefiting from the bond and the dollars it generates.

Who is leading the racial equity work at Metro and how it is being led is important. Predominantly white organizations have been providing racial equity education and this is an issue. Addressing white fragility is important; racial equity work is uncomfortable and cannot be done through white comfort filters.

#### Areas of disagreement within this audience:

There was not clear disagreement within this audience, there was lots of conversation about trails and prioritizing trails over other types of investments. The group ultimately decided that other priorities were more important than trails.

#### Suggestions for future engagement with this audience:

Meeting attendees requested more engagements that would build knowledge of bond issues within the Indigenous community. There is desire for opportunities for larger groups to be included, especially at organizations and locations where Indigenous community members gather. They would like to have tours of Metro sites and learn more about target areas and land acquisition. This group wants to learn as well as help inform and influence the details of how the bond priorities can be met. They want to be consulted and included at every step of the process possible, now through the election and beyond.

#### Additional information:

Appendix 1 – Community meeting notes 1 Appendix 2 – Community meeting notes 2 Appendix 3 – Community meeting notes 3

Meeting:	Indigenous community bond engagement
Date/time:	August 27, 2018
Place:	Metro Regional Center: Council Chambers

#### Attendees

Savahna Jackson, James Holt, Karen Kitchen, Alice Froehlich

#### Topics

#### Welcome

Metro parks and nature is beginning stakeholder engagement to help shape a 2019 bond renewal. In addition to this group there is a stakeholder table and a community cohort engagement group focusing on racial equity. The cohort consist of ten community leaders assisting with getting feedback from their larger communities. There is also engagement with the agricultural community and conservation groups who have traditionally been involved in bond creation in the past. Parks and nature director Jon Blasher requested a specific engagement strategy with the indigenous community.

Metro Council will hold a retreat on October 4 where recommendations from all of these groups will be presented.

#### **Bond 101**

#### What is a bond?

The bond will be around \$200 million dollars and can only be spent on buying public land and funding public capital projects. Capital projects are new construction or major improvements and does not include maintenance. Examples are: roads, culverts, large scale restoration projects, generally projects that cost at least \$50,000. No more than 10% of bond money can be spent on administrative costs.

#### Who can spend it?

Metro and other local governments have direct access to funds to buy land and complete capital projects. Local governments that receive direct funds are limited to park providers including cities and counties. Metro also provides grants for capital projects to nonprofits and other local governments including schools, utility providers and other special districts. This is the level where tribal governments can receive funding. The Nature in Neighborhoods grant program is an example of this type of funding.

#### Bond focus areas discussion Bond renewal current focus

Protecting land, improving park and natural areas and supporting community projects.

#### Acquisitions

When purchasing land with bond funds, the land must fit within certain criteria and be maintained, with non-bond funds, for these criteria. Long term purchasing plans were developed in the 1980s and 1990s with the past bond measures focusing on these target areas. Metro is currently looking at where land has been purchased and where there are current barriers to access. There are examples

of Metro purchased land managed through Intergovernmental Agreements, such as the agreement with Tualatin Hills Parks and Recreation District to manage Cooper Mountain Nature Park. Often nonprofits and smaller local governments often do not have the capacity to do this. Do tribes have the capacity to maintain land while trying to bring it back to its historical uses? Currently Metro is not aware of the criteria used by tribal governments for purchasing land.

#### Review of proposed criteria Protecting land

- Trails
  - Recognition they are a regional priority but are also extremely expensive to build
  - o The criteria specifically calls out walking and biking, does this include wildlife corridors?
  - o Focus on providing access to and connections between natural areas
- Clarification needed of the term "culturally significant land"
  - o Proposed change: Protect indigenous culturally significant land
  - To determine what is culturally significant engagement is needed with all tribal groups in the region, not just urban tribes.
  - Resources for what is culturally significant: Virginia Butler at PSU, Eirik Thorsgard's work with the Confederated Tribes of the Grand Ronde
  - Some may not want indigenous culturally significant land identified, clarification would need to be made between protecting this land and providing access
  - Provide a cultural resources assessment of all purchased land done either by or with partnership with indigenous community
- Proposed addition: Protect culturally significant native plants
  - Call out specific plants
  - Provide opportunity for ongoing engagement with plants
  - Include a list of preferred plants for Metro and partners to focus on for acquisitions, stabilizations and other capital projects.
- Language from 2006 bon regarding rarity should be included "Rarity, reflects the relative diversity of an ecosystem or possesses unique natural features"
- Proposed clarification: Protect salmon, trout, steelhead and lamprey
  - This may be implied in "protect stream and river banks" but preferences is to call out species
- New recreation
  - Proposed change: Provide new types of access and engagement with natural spaces (or the natural landscape)
  - Clarification on types of recreation, limit to no or low impact access
  - Will this be used to purchase new land with specific recreation activities in mind?

#### Creating welcoming nature parks

- Identify locations for big projects that will benefit the indigenous community, such as gathering spaces or access to water
  - o Killin Wetlands: Wocus in water but no current access point to water
  - Low impact access improvements
  - Stream area that could be purchased of a sweat lodge with wood burning permits

- Proposed language: infrastructure for the rejuvenation of cultural practices
  - o Infrastructure in existing and new places
  - This could fit under all three criteria: protecting land, creating welcoming nature parks and supporting community projects
- Existing park improvements: restrooms, additional parking
- Clarification needed on the vision
  - Provided by Jon: fulfilling the vision of the master plans of existing parks, question between beginning phase one for new parks or working on phase two at existing parks.
- Clarification on new parks
- Stipulations on who is doing the work, recommendations to hire M/WBE companies

#### Supporting community projects

• Increase portion spent on grants, reducing acquisitions

#### Next steps:

#### Questions to answer

Can another agency hold a grant program to distribute bond funds? Is there interest from other agencies in holding this type of program? Is Metro the best to make the decisions about where grant funding goes? Where does Metro want to buy land? What do IGAs look like?

#### **Documents to provide**

Copy of past bond resolutions Draft list of capital projects Map of priority purchase areas Example of IGA maintenance agreement

#### Next meeting

Monday, September 10: 12:30 – 4 p.m. Metro Regional Center: Council Chambers

Meeting:	Indigenous community bond engagement meeting 2
Date/time:	September 10, 2018
Place:	Metro Regional Center: Council Chambers

#### Attendees

Angela Morrill, Clifton Bruno, Christine Bruno, James Holt, Gerard Rodriguez, Karen Kitchen, Judy Bluehorse Skelton, Jessica Rojas

#### Topics

#### Welcome

Discussed the representation of the native community in the bond engagement process, Judy Bluehorse Skelton is a member of the stakeholder committee and James Holt is a member of the community forum cohort. Judy offered to meet with anyone individually to get as much input from the community as possible leading up to the Council presentation in October. The development of the two previous parks and nature bonds (1995 and 2006) did not include any engagement with the indigenous community.

This initial round of bond engagement is a higher level review of the bond funding criteria, a second phase of engagement will refine the criteria and identify specific projects. The criteria to be reviewed will be applied to land acquisition, capital projects and community grant programs. A parks and nature tour was requested specifically for this group, with the possibility of a spring tour to focus on specific projects relevant to the refinement process.

#### **Bond engagement**

Metro is currently in phase one of engagement and is getting input from the agricultural community, conservation community, indigenous community, local governments, metro staff and community members with the assistance of culturally specific organizations. Metro is committed to addressing equity in the process and outcomes of the bond engagement and development. A feedback loop confirming accurate and respectful representation of the information being gathered is required to ensure accountability in this process. Ultimately Metro Council will make the decision on what the bond will look like in December.

#### **Engagement timeline:**

- Sept 14: stakeholder table meeting #1
- Sept 22: community forum #1
- Sept 26: community forum #2
- Sept 27: stakeholder table meeting #2 (focusing on commitment to racial equity)
- Oct 11: Council retreat (cohort and indigenous community member to present)
- Oct 22: stakeholder table meeting #3

#### **Background information**

#### What is a bond?

The bond is for 8-10 years and will be around \$200 million dollars. Bond funds can only use for public land acquisition and public capital projects. Capital projects are new construction or major improvements. Examples are: roads, culverts, large scale restoration projects, generally projects

that cost at least \$50,000. No more than 10% of bond money can be spent on administrative costs and bond funds do not cover maintenance costs.

#### Who can spend it?

Metro and other local governments have direct access to funds to buy land and complete capital projects. Local governments that receive direct funds (local share) are limited to park providers including cities and counties. Metro also provides grants for capital projects to nonprofits and other local governments including schools, utility providers and other special districts. Metro's legal team is clarifying if tribal governments would be eligible for local share, direct award or only receiving grants. Funds can only be spent on projects that fit within the criteria set by Metro, this is an opportunity to advance Metro's racial equity work.

#### Bond focus areas discussion

#### Acquisition criteria (protecting land)

Rising land costs increases the importance of purchasing land now with the expectation that restoration and access projects can come later. Discussion around where land should be purchased led to the importance of understanding how Metro's proposed funding measures work together (housing, parks and nature, transportation) and the impact they will have on the lowest income levels of our communities. The group requested information on the 2040 growth plan in order to look at projections of demographic shifts, where low income and communities of color will be moving to, and recommend focusing on acquisition and access in those areas. The discussion on long term planning also stressed the importance of factoring in climate change into the bond decision making process.

#### Grants criteria (supporting community projects)

- Would like to continue a grant program as part of this bond
- Grant program to be balanced with groups recommended focus on land acquisition
- Focus on developing relationships with grantees
- Focus on communities and organizations in cities with less local park funding
- Develop accountability measures for ensuring grantees incorporate racial equity into their projects
- Continue supporting educational programs

#### **Review of proposed criteria**

#### **Protecting land**

- Proposed addition: protect groundwater, stream and riverbanks to support healthy water quality
  - o Stresses water quality as a quality of life issue
  - o Do not use watershed jargon, keep public audience in mind
  - Protecting waterways for resilient communities (human and wildlife)
- Reiteration of concerns about "recreation"
  - Clarification requested about what this includes, making it clear to the public about what would and would not be allowed
  - o Acknowledge that access will not be developed at all land being purchased

- Low-impact, culturally significant, prioritizing underserved communities, doesn't conflict with indigenous cultural values
- Purchase of lands specifically for recreational use that may not has as much conservation value

#### Next steps: Questions to answer What was the acreage purchased with past bonds?

#### Information to provide

Details of UGB expansion recently recommended to Council

#### Next meeting

Tuesday, September 25: noon – 4 p.m. Location: TBD Topic: focus on capital projects, less time spent on bond overview and acquisitions.

Meeting:	Indigenous community bond engagement meeting 3
Date/time:	September 25, 2018
Place:	Metro Regional Center: Council Chambers

#### Attendees

Clifton Bruno, Gabe Sheoships, Gerard Rodriguez, Christine Bruno, James Holt, Judy Bluehorse Skelton, Karen Kitchen, Jessica Rojas, Savahna Jackson, Seguoia Breck

#### Topics

#### Follow up information from past meetings

Alice Froehlich brought the following documents to help answer previous questions:

- 2040 plan: version from early 2000s has a map projecting where people will move
- Oregon State Conservation strategy has a chapter on climate change, the conservation community looks to this document for guidance. Alice will send a link to the document.
- Intertwine Alliance's Regional Conservation Strategy Executive Summary
- Bio diversity guide and conservation strategy, borrowed from Metro science manager •
- Metro parks and nature list of currently funded projects and priority projects for new funding •
- Metro Bond Target Areas binder: target area refinement process occurred after the 2006 bond • was approved by voters

#### **Community forum recap**

James Holt and Karen Kitchen participated in the Metro parks and nature bond community forum on September 22. The organizations Verde, Adelante Mujeres and Centro Cultural had the most turn out at the forum. Forum participants expressed the importance to engage underserved communities early and often during the decision making process, utilizing multiple languages in advertising and engagement materials. Key priorities reported from the forum included providing access to nature in underserved communities in terms of park location and proximity of nature to urban spaces as well as transportation and walkability options. Protecting culturally significant land, including sharing indigenous histories was also a priority. Participants also expressed the importance of using contractors from marginalized communities to perform the work of the bond.

#### **Criteria discussion**

#### **Community projects: local share and grants**

Grant funds need to be spent on public land, this typically includes a partnership between a nonprofit or special district government and park provider government agency. The group reviewed the community project criteria handout for what should be changed, added or removed. The following discussion emphasized bringing a human element to the grant program and focusing on projects that are led by the community, enhance soil quality for edibility, support cultural education and value livability and affordability.

- Priority given to projects initiated or led by culturally specific organizations to ensure meaningful relationship between grantee and the community the grant intends to serve
  - Prioritize culturally driven projects

### Appendix 3 Community meeting notes 3

- For other organizations partnering with culturally specific organizations, place weight on demonstrated relationship building prior to application
- Soil quality for restoring edibility
  - o Focus on the overall health of the soil to increase edibility
  - Support "projects that reduce and eliminate toxins in our landscape" as a more general way to address edibility
  - Support community-based projects that develop a relationship with the land around eating from the landscape
  - Include limitations on gathering, tending and foraging
- Education opportunities to access science in a way that is culturally relevant and significant
  - o "Culturally relevant or significant" to be inclusive of more than just indigenous communities
  - Focus on providing access to STEM for at-risk or marginally affected youth
  - Promote environmental career pathways by engaging older youth and teens
  - Require capital projects to include an educational or interpretation piece
- Learning from past grant programs:
  - Provide bridge building opportunities between conservation and culturally specific organizations for meaningful engagement
  - Require outreach to underserved communities when developing projects
  - o Involve all partners in all aspects of the grant process
  - Remove barriers to grant administration including providing funding for administration
  - Include culturally specific community members on grant application review committees and provide compensation for participation
  - Many culturally significant sites that fall within the jurisdiction of local share, Metro should require "cultural competency" or "culturally responsibility" among local share recipients
- Recognition of what to not provide funding for:
  - Nothing dominated by settler mythology
    - No funding for the end of the Oregon Trail
    - Nothing that doesn't respect history prior to the 1830s and settlers

#### **Report to Council**

#### Key themes on racial equity:

Separating out racial equity as a distinct bullet point demonstrates the issue, this should be imbedded in all aspects of the bond development and work at Metro, not just viewed as a box to be checked.

Equity needs to be included throughout the whole system

- Who does the work: engaging COBID companies and help those companies build capacity to take on an increased workload
- Who is engaged: money needs to be set aside to engage communities of color, people of color often can't engage because of a lack of resources. Engagement is expensive but it is a wise, long term investment.
- Class informed lens: engage vulnerable communities throughout every stage of planning
- Who accesses the sites: it takes time to have the capacity to access to mainstream western environmentalism and connections with nature, avoid conservation jargon and frame connection with nature as a basic human need

• Who gets the grants: providing funds for long-term capacity building to help communities have a place at the decision making table. Support the work of the community, don't lead.

Who is leading the racial equity work at Metro and how, key criteria for hiring a consultant

- Predominantly white organizations have been providing racial equity education
- Who is doing the equity work matters. A white person, who doesn't have the lived experience, cannot be leading racial equity.
- Addressing white fragility is important, racial equity work is uncomfortable and cannot be done through white comfort filters
- Ensure that what is being said at engagement events and on the stakeholder table is being accurately captured

#### Key priorities:

- Where and how people interacting in the land
- Preserving nature and affordability at the same time
- General health of the land: protecting native plants, soil and waterways
- Purchasing land with lens of cultural significance
- Revitalization of cultural practices
- Changing systems of who is in power and who has access

#### **Key concerns:**

- Exclusion of people in the plan, need a clear understanding of how all of Metro's proposed funding measures work together to support the people of the region
- Gentrification
  - How to make it easier for low income community members to access nature close to home without creating another avenue for gentrification
  - Looking at gentrification intergenerationally, considering both where communities are now and where communities are being pushed out to
  - Intersection with the housing bond, inclusion of natural areas zoned to allow for affordable housing on site or prioritizing close proximity of affordable housing to access to nature
- Honoring the indigenous sense of time and space, ensuring a longevity point of view rather than prioritizing short term success
- If we are managing for edibility and long-term sustainability of landscape, include limits on harvesting
- Creating a safe space for children to access nature close to home to develop lifelong relationships with the land beyond school activities
- Addressing human needs in natural areas
  - Providing resources for houseless communities to be in nature in a more habitable way, affordable camping, access to restrooms
- Preparing for the unexpected

#### **Engagement next steps**

This phase of engagement is quickly wrapping up. Council will meet on October 11 for a retreat a Blue Lake Park. James Holt will present with the community cohort and offered to also represent

this group. Many members of the group expressed interest in attending to also present or provide support. The group will meet for an hour prior to attending the retreat.

Council will make the decision to set the framework in December. The group would like transparency on how their feedback has been included in the recommendation. It is import to provide a feedback loop to allow the group to view and comment on the recommended framework before it is officially approved by Council.

The bond renewal engagement is part of larger long-term relationship building needed with the indigenous community. The group discussed engagement opportunities with the larger community leading to the next phase of engagement as an opportunity to help educate people about Metro and the department. Hiring a consultant from the community to lead the larger engagement effort was proposed. Alice requested the group send her any consultant recommendations. Engagement opportunities include providing information at upcoming events such as October 8 Indigenous Peoples Day events and events during November Native American Heritage Month. The group also requested tours this fall or winter focusing on Metro projects that are indigenous culturally specific. In the late spring/early winter, the second phase of engagement will dive deeper into specific target areas and projects based on the criteria approved by Metro Council in December.

#### Next meeting:

Council Retreat Thursday, October 11: 11 a.m. - noon Location: Blue Lake Park, Chinook Shelter

Wednesday, October 17: After NACA meeting

Tour: TBD

## Potential parks and nature bond measure Conservation engagement report | Fall 2018

Completed by: Jonathan Soll, Science Manager, Metro Parks and Nature Department

**Audience overview:** Conservation organizations have been important partners in shaping Metro's parks and nature system and helping carry out projects over the past three decades. Thirty conversations were held with organizations we considered conservation-oriented, including nonprofits (10), watershed councils (9), soil and water conservation districts (4), water treatment providers (3), state and federal natural resource agencies (3), and tribal government natural resource departments (1). This group specifically excluded park providers, who were interviewed as part of the local jurisdiction group by other Metro staff. A list of organizations and staff with whom we have met to date follows as Attachment 1.

Conversations are still pending with other tribal natural resource departments and Willamette Riverkeeper.

**Engagement format:** Conversations were held between Jonathan Soll, Metro's Parks and Nature Department Science Division Manager, and representatives of the given organization. Most meetings were one-on-one or in small groups, typically with senior staff and one or two board members. Conversations with the Tryon Creek Watershed Council and the Portland Bureau of Environmental Services were in a roundtable format with many participants. Conversations with soil and water conservation districts and watershed councils do not represent formal positions of those organizations, but in each case the manager or executive director conferred with their board or brought individual board members to provide insight into the issues of concern to the organization.

Conversations started with Jonathan explaining capital vs. non-capital expenses, providing an overview of the history of the bond program and Metro's commitment to integrating diversity, equity and inclusion goals into a potential future measure, before proceeding to explore the organization's opinion of past efforts and needs for the future (see conversation guide that follows this summary as Attachment 2). Jonathan then guided each organization through a conversation about major investment and conservation themes, as well as any geographic priorities, with consideration given to how Metro might adapt our priorities and criteria and integrate our capital investment initiatives.

**Engagement point people:** Jonathan Soll held all discussions.

#### **Overview**:

• There was unanimity that Metro's investment in land conservation through the previous bond measures has played a unique and vital role in the region ecologically, socially and economically. Ideas for future investment strategy, criteria and focus varied in the details with the perspective of the organization, but all organizations embraced the current three general categories of investment: Metro, local share and capital grants. All but one organization (Tualatin Soil and Water Conservation District) strongly supports Metro asking voters for additional capital funding.

### Conservation engagement report | Fall 2018

- Many organizations had only partial understanding of the capital vs. non-capital issue or how past bond investments have been used throughout the region. Most organizations over-estimated the percentage of past investment outside the urban growth boundary.
- All groups agree that a regional approach to protecting water quality, wildlife habitat and meaningful access to nature close to home should remain core elements of a future bond measure.
- Twenty-eight of 30 groups strongly support land acquisition inside and outside the urban growth boudnary. Groups rooted firmly in the urban core such as the Columbia Slough Watershed Council, Greater Oregon City Watershed Council, Johnson Creek Watershed Council, North Clackamas Urban Watershed Council or Portland Bureau of Environmental Services emphasized continued investment inside the boundary and integrating habitat conservation with park access, trails and storm-water management. Regionally focused groups such as the Clackamas River Watershed Council, Columbia Land Trust, the Confederated Tribes of the Grand Ronde, the Oregon Department of Fish and Wildlife, the Sandy River Watershed Council and The Nature Conservancy particularly value Metro's unique regional role in protecting and managing larger landscapes. Although the West Multnomah County and Tualatin Soil and Water Conservation Districts staff reflected concerns from some members of their boards about acquisition outside the urban growth boundary and the fate of agricultural lands, they both hoped that protection of agricultural land through the soil and water conservation districts could be a future strategy and that capital investment via Metro was positive overall. The Clackamas and East Multnomah districts unequivocally saw Metro as a strong ally in such efforts, which could be integrated with more typical conservation approaches. Water quality providers Clackamas Water and Environment Services, Portland Bureau of Environmental Services, and Washington County Clean Water Services all embrace the partnership, leverage and catalytic power of Metro capital investment to expand their ability to deliver projects with multiple benefits to their communities.

### Major themes included:

- Get and stay ahead of rapid growth
- Improve habitat, ecosystem service provision and access to nature in developed areas
- Implement habitat and species priorities of the Oregon Conservation Strategy and Regional Conservation Strategy.
- Conserve rivers, streams and their floodplains for habitat, water quality (for animals and people), flood control, and regional connectivity
- Habitat connectivity is important at all geographic scales, especially to address climate change
- Connect neighborhoods to parks, ideally with non-motorized options
- The dichotomy of nature or people is false; protecting nature protects people.
- Access is important, but not all areas should have access and there are many benefits to people other than access
- Urban conservation should often be integrated with access
- Metro funding is often a catalytic element of projects led by partners and community organizations and is a practically irreplaceable asset for leveraging other funds
- Our regulatory framework assumes investment from bonds as a core strategy for healthy nature

### Conservation engagement report | Fall 2018

• Exploring opportunities to integrate investment in transportation, housing and nature is a good idea.

### Key priorities identified for potential bond measure:

- Protect land both inside and outside the urban growth boundary
- Protect and restore habitat connectivity at multiple scales
- Protect water
  - Water quality remains important, availability and flood control are rising concerns
  - Protect headwaters and floodplains
  - Conserve salmon, with emphasis on Sandy and Clackamas populations
  - Native Americans care about lamprey as much as salmon
- Conserve rare habitats and species, especially oak and prairie
- Projects with multiple benefits (habitat, storm-water, access) are important, especially in areas developed pre-Title 13
- Continue capital grant program and other approaches to leverage community capacity
- Develop new approaches to partnership with the rural/farm community
- Empower partners

### Key concerns identified about potential bond measure:

- The agricultural community remains concerned about the loss of farmland
- Long-term operations and maintenance

### Key themes on racial equity:

- All organizations support the idea of diversity, equity and inclusion being a component of a new bond and are considering how to best address it within their organizations. Some are further along evolving their thinking and programs than others
- The diversity, equity and inclusion lens should not become a filter
- Investment in today's underserved geographies may not address tomorrow's population distribution
- Programmatic investment may be more effective than capital investment for addressing some equity issues, and is necessary regardless

### Areas of disagreement within this audience:

- There is no fundamental disagreement among the overwhelming majority of organizations in this group
- Two of 30 organizations voiced concerns with investment far outside the urban growth boundary

### Suggestions for future engagement with this audience:

The conservation community enthusiastically embraces additional capital investment in nature, and all of the organizations expressed interest in continuing to participate in the conversation of shaping a bond measure. Nearly all expressed excitement to participate in a group meeting in

## Potential parks and nature bond measure Conservation engagement report | Fall 2018

autumn to look for synergy and consensus. Two organizations asked for more interaction between their board of directors and Metro and specifically the Parks and Nature Department, to build better understanding and trust (Tualatin Soil and Water Conservation District, Tualatin Watershed Council).

### **Appendix 2** Ideas for future capital investment in nature in our region

Conversations between Metro and with Conservation Partners Summer 2018

Questions / General Agenda

- Metro is exploring a third bond measure, likely for the November, 2019 ballot.
- What does "Bond Measure" mean?
  - o Bond 1 and 2 overview, history, rules of capital investment
- Metro is emphasizing diversity, equity and inclusion (DEI) and a racial equity lens as part of moving ahead for the benefit of our entire community
  - What this means to Metro and how it might affect this effort.
- Questions for our partners
  - What are your organizations conservation priorities in the Metro Region for the next 1-2 decades?
  - o Given that, how do you think Metro should invest future capital funding (if at all)?
    - Thematically, including land kept in agricultural/forestry production vs. taken out of production.
    - Geographically specifically
    - Even specific projects you hope can be accomplished
  - What are the types of activities or restrictions that are most/least desirable on properties that are preserved or purchased with Metro bond funds?
  - How do you see conservation efforts best aligning with other regional challenges such as growth, housing and transportation?
    - What priorities for a potential new bond would lead to the best outcomes for conservation? Agriculture? Rural communities? Other interests of concern to you?
    - If bond funds could be used by governmental entities (including SWCDs) to acquire/hold easements or fee title, how would this affect your work? Specifically, under what scenarios could you incorporate Metro funding into existing or potential funding sources for similar projects?
  - How is your organization addressing DEI, specifically racial equity?
- We will have many opportunities for input and community conversation about this issue, but the form and timing are still evolving.
  - How would you like to be involved in these or otherwise helping to shape or promote a potential Bond Measure moving forward?
  - o What additional information would you like from us?
- Who else we are talking to and next steps in the process

# Potential parks and nature bond measure Local agency engagement report | Fall 2018

Completed by: Robert Spurlock, Mary Rose Navarro, Brian Moore

**Audience overview:** Local park agencies are an important audience because they receive local share funding, build and maintain regional trails, and partner with Metro in natural area land management. Metro engaged with staff at local park provider agencies, including the cities within the Metro boundary, Clackamas and Washington county parks departments (Multnomah County does not have one) and two park districts: Tualatin Hills Park and Recreation District and North Clackamas Parks and Recreation District. Depending on the size and organizational structure of the agency, staff representatives may have been city managers, parks directors, community development directors, public works directors, city planners or parks planners.

**Engagement format:** We held one-hour meetings, in person at the local agency's offices. In a few cases we conducted phone interviews instead of face-to-face meetings. We reviewed current parks system plans and capital improvement project lists, and paid particular attention to the results of any recent community engagement that identified investment priorities.

**Engagement point people:** Robert Spurlock, Mary Rose Navarro and Brian Moore represented Metro at the meetings.

**Key priorities identified for potential bond measure:** The following themes emerged from the conversations and are listed here in order of how frequently they were mentioned:

- *Local share.* Every agency (with the exception of one or two) emphatically stated the importance of local share dollars to their budgets. The relative importance of local share to a given city's overall parks budget spans a wide range. For example, Gresham described local share as critical while Portland and Wilsonville characterized it as a welcome supplement to project budgets. Some cities have waived parks system development charges in an effort to incentivize more housing development at a lower cost. Without SDC funding, these cities are all the more reliant on local share funding. Many cities requested that Metro consider increasing the local share portion of the overall funding allocation, relative to the past bonds.
- *Local share flexibility.* Ten agencies expressed a desire for fewer restrictions in how local share funds can be spent. Most of these 10 agencies pointed to the need for more active recreation improvements including sports fields within their systems.
- *Trails.* Every local park provider with the exception of Johnson City named trails as a priority for their community and as an area where bond measure funding could make an important contribution. Within the theme of trails several needs emerged, including (in order of frequency):
  - o completing gaps in the regional trails network
  - o land/easement acquisition
  - bridges (several cities are seeking funding for new bike/ped bridges, which tend to be expensive)
  - o trails needed as part of transportation system improvements
  - o trails needed for economic development
  - o new trailheads
  - o existing trails that are now substandard or deteriorating and in need of upgrades

### Local agency engagement report | Fall 2018

- *Neighborhood park improvements.* Twenty of the local park providers named new capital improvements for neighborhood parks as a priority within their community. Specific needs within this theme included (in order of frequency):
  - New neighborhood parks (either on land they already own or on new land to be acquired)
  - New nature play areas
  - o New traditional play structures
  - o New restrooms
  - o Picnic shelters
  - Habitat restoration in local parks
  - Community gardens
- *Land acquisition.* Nineteen of the local park providers named land acquisition as an important area where they would like to spend future bond dollars. Specific priorities for land acquisition, listed in order of frequency, include:
  - o Trail easement/land acquisition
  - o Local/neighborhood park land acquisition
  - Creek/river corridor, floodplain or headwaters acquisition
  - Natural area or "open space" acquisition some considered this a need while others cited it as a concern. See the "concerns" section, below.
- *Renewal and replacement and/or deferred maintenance.* Half the local park providers brought up the issue of aging infrastructure in existing parks. Of these 13 agencies, most emphasized that this issue has become so serious that it is affecting their capacity to open and maintain new parks. The following types of facilities, listed in order of frequency, were cited as needing replacement.
  - o Irrigation systems
  - o Play structures
  - o Trails
  - Parking lots
  - o Restrooms
  - Picnic shelters
  - Furnishings, such as benches and picnic tables
- *Water access*. Ten agencies, particularly those along the Tualatin and Willamette rivers, raised the issue of providing new riverfront access areas, or making improvements to existing areas. Non-motorized boat launches were the most common need discussed, followed by motorized boat ramps and beach/swimming access.
- *ADA upgrades.* Seven agencies specifically discussed the urgency of making park facilities welcoming for people of all abilities. Specific types of facilities that were mentioned include:
  - o Trails
  - o Play areas
  - o Restrooms
  - Park furnishings
- Other themes that emerged included:

### Local agency engagement report | Fall 2018

- Tualatin made a strong case for a new regional nature park at Metro's Heritage Pine Natural Area
- The ability to use bond dollars to fund master planning efforts
- Green infrastructure needs, such as bioswales, fish passage-deficient culvert replacements and street trees
- o Improvements to camping facilities in Clackamas County parks

### Key concerns identified about potential bond measure:

- Nearly every agency expressed concerns about the voters' willingness to pass three Metro funding measures in the next three years in addition to local funding measures that were either recently passed or are planned to appear on local ballots in the near future. Local staff used terms like "tax fatigue" and "bond burnout." The bigger concern was not that a Metro parks bond would fail, but that voters would not support local funding measures.
  - Local staff mentioned a number of recent funding measures that passed:
    - Forest Grove passed local operating levy
    - West Linn passed bond measure in May 2018.
    - Tualatin passed transportation bond in May 2018.
    - Gresham Barlow School Disrict just passed a bond.
    - Sherwood School District bond passed a couple years ago.
  - Staff mentioned several more measures that may appear in the future:
    - Oregon City School District going to ballot in November 2018.
    - North Clackamas School District on ballot November 2018.
    - Clackamas County going to ballot in May 2019 for new courthouse.
    - Lake Oswego is considering a parks bond in May 2019.
    - Possible that Tualatin would go for local parks bond in November 2019.
    - THPRD may be going for another bond in 3 to 7 years.
    - Sherwood is considering a public safety levy.
- Parks are just one of many infrastructure needs. There is a possible perception within smaller cities that this money could be better spent on other infrastructure needs like sewer, water and streets.
- Metro should do a better job of marketing the three funding measures as a coordinated strategy, rather than piecemeal.
- Many local providers expressed a concern that if we buy more land and build more parks, we will put pressure on our already stressed maintenance resources. In several jurisdictions, renewal and replacement is the bigger need.
- The growing presence of people experiencing houselessness in our parks and natural areas creates a need for more enforcement. Adding more natural area land will increase the need for enforcement.
- Most cities expressed a strong desire to have a local share component. This desire was sometimes expressed as a concern that Metro may decide to make local investments through grant awards rather than through direct allocations. Direct allocations are preferred over grants

### Local agency engagement report | Fall 2018

because they are more predictable. Local share's predictability has made it an important tool for local agencies in the past.

- If there is a grant component to the next bond, continuing the 2:1 local match requirement would be a concern to many.
- When community organizations apply for and receive grants, the local agency then has to devote a lot of time and staff resources to the project, even if it isn't the local agency's priority. These projects build capacity for community organizations but require agencies to invest a lot of expertise and time.
- Some local partners shared that their cities don't have many natural area and restoration opportunities within their boundaries, while others expressed a concern that the Metro bond isn't geared toward their communities' more pressing parks-related needs, such as developed parks and active recreation.
- One city expressed a big need for removing invasive plants from local natural areas, but was concerned that this type of work isn't capital and would therefore not be eligible for bond funding.

### Key themes on racial equity:

Several cities (though by no means all) exhibited a strong focus on advancing racial equity through their parks work. Key themes that emerged included:

- While a particular city by itself may not be racially diverse, there is a recognition that particular parks within that city can be regional draws that serve diverse populations. Examples include Milwaukie Bay Park and Gladstone's Meldrum Bar Park.
- Several local agencies mentioned that regional guidance from Metro on diversity, equity and inclusion would be appreciated, and one city suggested that bond funding could be used to develop local racial equity plans.
- Making parks responsive to and reflective of the populations they serve. Many cities have directly engaged communities of color for direction in how to achieve this goal. In response to this input, local parks agencies are working to provide the following:
  - New parks in park-deficient areas that also have historically marginalized population
  - Family gathering places
  - Culturally specific sports such as futsal courts, soccer fields and cricket pitches
  - Restrooms. There is a growing recognition that for many and especially people of color clean restrooms are an integral part of access to nature.
  - New trails as a way to connect park-deficient, historically marginalized populations to existing community parks in neighboring, well-served communities.
  - Community gardens
  - Places to hang piñatas in picnic shelters
  - o Installing public art that is reflective of the community
- Many cities are incorporating diversity, equity and inclusion into how they do business. For example:
  - Staff trainings that are of a deep and meaningful nature
  - Hiring MWESB contractors
  - Eliminating barriers to hiring in maintenance departments

### Local agency engagement report | Fall 2018

- Building community partnerships with community based organizations, schools and tribes
- Conducting multilingual outreach
- o Engaging historically marginalized communities in planning and design
- o Providing language interpretation at events
- Developing tribal cultural exchange programs
- o Utilizing youth work corps programs

### Areas of disagreement within this audience:

Some cities expressed a fear that by focusing solely on racial equity, their residents will perceive this as an inherently inequitable distribution of resources. In other words, white taxpayers may feel that they are paying in more than they are receiving. The refrain, "we try to serve everyone equally" was sometimes heard.

By contrast, other cities suggested that in order to truly prioritize racial equity, bond funds should be allocated based on the percent of a given city's population that is non-white. In other words, more racially diverse cities would receive a larger share.

### Suggestions for future engagement with this audience:

Most cities suggested that Metro representatives (councilors, executive leadership or project staff) present to local elected officials, beginning after January 2019 so that those who are newly elected this November will be seated. If and when these presentations happen, local staff suggested that Metro bring up-to-date versions of maps and lists showing past projects and investments in local jurisdictions.

### Questions from this audience:

- 1. Can local share be used outside UGB? (Clackamas County and Washington counties both asked)
- 2. When we get our tax bill, will we see two simultaneous Metro Natural Area bonds that expire at different times, or just a single bond that's extended?
- 3. Is there a way to use Metro bond funds to offset SDCs?
- 4. What can the bond do to help local jurisdictions with their wetland mitigation needs? Mitigation for parks and trails projects can sometimes cost as much as the projects themselves.
- 5. What will the formula be for allocating local share?
- 6. Would Metro be willing/able to use regional share to acquire local-scale properties?
- 7. What happens if Metro's housing bond doesn't pass?
- 8. Would this bond be eligible to completely rebuild some existing trails that are now failing?
- 9. Are there ways to leverage emergency preparedness dollars for flooding with these bond dollars? Could this be criteria for grants?

# Engagement goals

Respond to community needs

Elevate communities of color

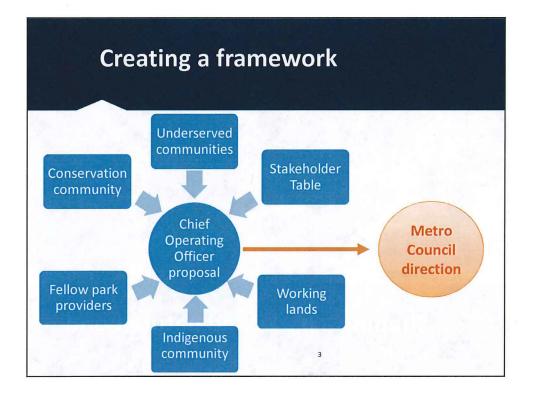

Advance racial equity

Strengthen awareness and trust in Metro

Stronger relationships between organizations

Report back to community

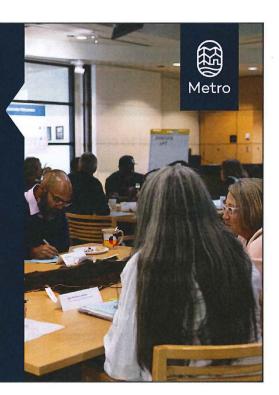

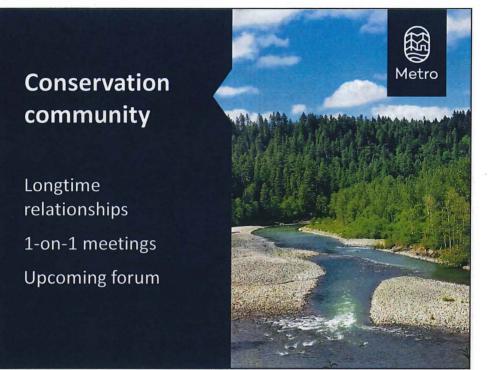

# Stakeholder table

### 25 members

- 2 meetings so far, 2 more in first phase
- Framework recommendation to chief op<u>erating officer</u>

# **Conservation community themes**

Metro land conservation plays a unique and vital role in the region

Protect land inside and outside UGB; prioritize habitat connectivity, rare habitats and species like oak and prairie

Water is more important than ever; protect headwaters, floodplains, salmon

Support diversity, equity and inclusion

### Park provider themes

Value local share, want flexibility

Prioritize trails, local park improvements, land acquisition, and renewal and replacement

Concerned about voters – local and regional

Wide spectrum of racial equity experience and commitment

# Working land themes

Protect land threatened by development Keep most productive farmland in farming Consider easements, instead of purchases Have trusted partners manage land Engage with ag community more regularly Minimize impacts to neighboring farmers

5

# Indigenous community

Metro serves as stewards of ancestral and ceded homelands

3 sessions with Portland Parks Native American Community Advisory Council members

## Indigenous community themes

Protect culturally significant land and plants; salmon, steelhead and lamprey

Protect clean water and rare habitats

Park improvements should prioritize underserved communities, including indigenous community needs like gathering spaces and access to water

Not just what we do, but how we do it

# Historically marginalized communities

Cohort of culturally specific, conservation groups creating engagement

2 community forums, 100+ participants

# **Community forums themes**

Community engagement

Displacement

Impact analysis

Intersectionality
