

Staff report on bond work in calendar year 2021

For the Natural Areas and Capital Program Performance Oversight Committee

April 2022

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car - we've already crossed paths.

So, hello. We're Metro - nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories and things to do.

Acquisitions	24

Date: April 2022

To: Natural Areas and Capital Program Performance Oversight Committee

Re: Staff report on bond work in calendar year 2021

PURPOSE

The Natural Areas and Capital Program Performance Oversight Committee provides independent oversight of the 2019 parks and nature bond, the remainder of the 2006 natural areas bond and capital investments from Metro's parks and nature five-year local option levy.

As part of this charge, the Metro Council has asked the Oversight Committee to monitor how bond implementation activities are meeting the direction in the bond measure, to monitor financial aspects of program administration and to share with the Metro Council related concerns or recommendations to help adjust work moving forward. This report is intended to summarize information for the committee's review by providing:

- 1. Summaries of how bond activities in the last year are addressing the three bond criteria
- 2. Status updates on each of the six bond program areas
- 3. Reporting on bond spending and other bond financial data

BACKGROUND ON METRO PARKS AND NATURE VOTER APPROVED INVESTMENTS

For more than two decades, voters have repeatedly trusted Metro to protect clean water, restore fish and wildlife habitat and provide opportunities for people to connect with nature close to home through the passage of three capital bond measures and two local option levies.

The voter approved bond measures and levies are linked together to make the region's system of parks, trails and natural areas possible. The three capital bond measures (1995, 2006 and 2019) have supported the acquisition of more than 15,000 acres of priority habitat, investments in parks, trails and natural areas around the region. Metro's parks and nature local-option levy supports restoration of fish and wildlife habitat on lands purchased with the bond measure, and invests in park operations and improvements and community education, programming and grants to projects designed by community that strengthen people's connection to nature close to home.

1. ADDRESSING THE BOND CRITERIA

The Metro Council included three overarching criteria to govern 2019 parks and nature bond programs: racial equity, climate resilience and community engagement. The completed list of the bond criteria can be found in the appendix on page 14. Each of the six bond program areas will advance these bond criteria in different ways by providing direction to community grant or local share recipients or applying this policy direction to Metro's investments at its facilities and sites across the region. The Natural Areas Oversight Committee provides independent review of whether and how the bond activities are meeting the direction from the Metro Council and endorsed by voters of the region.

The following is a summary of efforts in the last calendar year to advance the three bond criteria through program development, tool building and fostering shared understanding. As bond investments continue, the committee's evaluation of how bond programs are meeting these criteria will continue to evolve.

Build resources and tools to understand how to advance climate resilience through bond investments made by Metro, grant recipients and the region's local park providers

- This bond measure builds on the legacy of 25-plus years of protecting the region's special places through land acquisition and restoration. Land acquisition is at the heart of Metro's parks and nature department work and has allowed for purchasing land to protect the region's priority habitats and species as outlined in the Oregon Conservation Strategy and Regional Conservation Strategy including riparian, floodplain, wetlands, oak woodland and forest, oak savanna and prairie and upland forest.
- Advanced an <u>understanding of concepts underlying climate resilience</u> for Metro staff, local park providers and other grant recipients by providing additional resources on considerations and definitions.
- As part of the refinement of land acquisition priorities, Metro staff engaged with BIPOC and people with disabilities and applied these findings to conduct an initial analysis that provides additional context on environmental burdens, access to natural areas and where potential land purchases may have greater opportunity to prevent flooding for these communities. This analysis will complement the data from the ecological assessments. Staff will continue to refine this analysis and identify additional uses for it across Parks and Nature's portfolio.

Ensure that bond programs are considering and addressing racial disparities in benefits from our parks, trails and natural areas

• Set a 20 % minimum for participation of minority-owned, women-owned and emerging small business owners registered with Oregon's Certification Office for Business Inclusion and Diversity (COBID) for bond contracting, with plans to set and meet higher goals for COBID participation through the life of the bond.

- Set a 20 % minimum for participation of minority-owned, women-owned and
 emerging small business owners registered with <u>Oregon's Certification Office for</u>
 <u>Business Inclusion and Diversity (COBID)</u> for bond contracting, with plans to set and
 meet higher goals for COBID participation through the life of the bond. In addition,
 developing and evaluating strategies to meet and exceed these goals including
 outreach with and technical assistance to potential contractors and reducing barriers
 to entry.
- Incorporated the requirements of Metro's Construction Career Pathways framework to increase the opportunities for access to the trades for women and people of color in greater Portland on bond funded projects at Metro facilities. The request for proposals for the upcoming bond funded improvement projects at Blue Lake Regional Park is the first to use Metro's Construction Careers Pathways Project framework to set specific diversity goals alongside its construction requirements for contractors.
- Supported local park providers to implement goals and tracking around COBID participation and workforce diversity for bond funded investments.
- Conducted <u>an initial analysis</u> of anti-displacement impacts and mitigation strategies
 related to trails and natural area investments and sharing those considerations with
 Metro staff and the region's park providers.
- Hosted <u>roundtables</u> for the region's park providers to share lessons learned about topics such as meaningful community engagement, tribal government engagement, anti-displacement, contracting with minority and women owned firms and workforce diversity.

Carry out meaningful community engagement that centers the needs and builds trust with BIPOC and other marginalized community members

- Implement a community engagement framework that centers the voices of Black,
 Indigenous and other people of color (BIPOC), LGBTQ+ community members,
 immigrants and refugees, people with low incomes, people with disabilities, and other marginalized communities.
- Goals for <u>community engagement</u> during the last year of bond refinement activities included
 - Center BIPOC communities in development of bond programs and prioritization of bond investments
 - Increase transparency and access about bond decision-making
 - o Shift decision-making to community members where possible
- Utilized a broad set of community engagement strategies and tactics to achieve these goals, which are summarized in the appendix in this report on page 16.

Develop bond evaluation framework

The voters of the region have asked us to do our work differently with this bond and that means listening and learning about the needs and priorities of communities who haven't benefitted equitably from previous investments. This also means we need to identify new ways to understand whether and how we are fulfilling this promise. Metro's Parks and Nature department has experience in collecting a robust set of data to quantify our work funded by voter approved measures and the values of this bond require us to think differently about measuring our impact.

Metro staff have launched a process with a consultant, Dialogues in Action, to develop a framework to monitor efforts towards meeting the three bond criteria and measuring the impact of bond investments through the life of the bond. Staff anticipates bringing an update on the status of this work for the committee's review and expects that the oversight committee will want to help shape the analysis of data as part of its work in 2022 and beyond.

2. BOND REFINEMENT PROGRAM UPDATES

Bond refinement, the process to turn the bond measure language into six functional programs, will be nearly complete by spring 2022. Previous natural areas bond measures in 1995 and 2006 went through similar refinement processes. The 2019 parks and nature bond is following that same trajectory with staff having built six new bond programs with entirely new criteria that shift how we do our work. It takes time to build programs that center racial equity and climate resilience and to conduct meaningful community engagement in ways that actually shape these processes and programs. This work has been completed in the context of the COVID-19 pandemic, which impacted Metro as an agency as well as the capacity of Metro staff, partners and community members in unanticipated ways. The following summary provides updates on the status of each program area and work completed to date. More detail about the specific engagement activities for the development of each program area can be found in the community engagement summary in the appendix on page 16.

PROTECT AND RESTORE LAND

\$155 million allocated for acquisition and restoration of priority habitat across 24 target areas, https://www.oregonmetro.gov/protect-and-restore-land

Program description: Protect and restore land builds on the successes of the 1995 and 2006 natural areas bond measures in protecting greater Portland's special places, by purchasing land and restoring it in 24 target areas across the region. Land protection and restoration in all 24 target areas helps restore and preserve regional watersheds, protect some of the region's rarest habitats, protect culturally important plants and create future potential access to nature.

Key bond refinement activities completed in 2021:

- <u>Completed ecological assessments of the 24 target areas</u> outlined in the bond measure with deep partnerships and ongoing input from members of the urban Indigenous community
- Engagement sessions to help confirm priorities and compile local knowledge for each
 of the 24 target areas with conservation partners, park providers and community
 members including focused engagement with BIPOC and people with disabilities.
 Summaries of these engagements and the feedback received can be found in the
 appendix and on the Metro website.
- <u>Develop draft refinement plans</u> that articulate a road map for acquisition for each of the 24 target areas based on information collected and engagement findings
- Creating space for tribal governments to provide input on the priorities in refinement plans currently and post-Council approval in spring 2022
- In spring 2022, Council's consideration and approval of refinement plans for each of the 24 target areas will give staff direction to purchase land through our willing seller program.

- Finalize refinement plans that articulate a road map for acquisition for each of the 24 target areas based on information collected and engagement findings
- Purchase land in priority habitats across the region through willing seller program
- Continue to receive feedback from tribal governments on refinement plans

LOCAL SHARE

\$92 million allocated to local governments for park improvement projects and locally important acquisitions, www.oregonmetro.gov/localshare

Program description: The local share program distributes \$92 million to 27 park providers (23 cities, 2 counties and 2 park districts) across the metro area to invest in their community's parks and nature projects including land acquisition, habitat restoration and connectivity, park access facilities at public parks and natural areas, local and regional trails and interpretive or environmental education facilities.

Key bond refinement activities completed in 2021:

- Developed a <u>local share program handbook</u> and supporting materials that provides guidance to park providers as they identify and submit priority projects
- Metro Council approved an Intergovernmental Agreement template to govern individual agreements with park providers once they have submitted projects
- Convened the region's 27 park providers in monthly roundtables to share lessons learned around addressing the bond criteria including community engagement and anti-displacement
- Approved the use of local share funds for the <u>City of Gresham to acquire land near</u> <u>Southwest Community Park</u>

- Review park providers' project submissions and finalizing agreements to disburse bond funds
- Convene the region's 27 park providers to share lessons learned around meeting the bond criteria including tribal government engagement

NATURE IN NEIGHBORHOODS CAPITAL GRANTS

\$40 million to community groups, non-profits and local governments for projects that "re-green" or "renature" neighborhoods, https://www.oregonmetro.gov/tools-partners/grants-and-resources/nature-grants

Program description: The Nature in Neighborhoods capital grants program provides up to \$40 million for grants supporting projects that protect and improve water quality and fish and wildlife habitat, support climate resilience and increase people's experience of nature at the community scale. This program also includes the Nature in Neighborhoods Capital Grants Pilot, which will use a participatory budgeting process and recommend up to \$4 million in grant funding to Metro Council to invest in projects selected by the community and that benefit BIPOC and other historically marginalized communities.

Key bond refinement activities completed in 2021:

- Designed framework for capital grants pilot in partnership with Participatory Budgeting Oregon
- Recruited and convened a committee of community members to help design the capital grants pilot program and began meeting in January 2022

- Launch and support the committee to help design the solicitation for up to \$4 million in grant funding through the capital grants pilot program
- Work with committee to develop a guidebook to launch the solicitation of project ideas in summer 2022.
- Begin to develop the guidebook for the Nature in Neighborhoods grant program for the remainder of the program funds to launch in 2023

WALKING AND BIKING TRAILS

\$40 million for building out the regional trails network, <u>oregonmetro.gov/regional-trails-and-greenways-system</u>

Program description: This program provides \$40 million to plan and build out trails that close gaps in the regional trails system via \$10 million for acquisition from willing sellers and roughly \$20 million for competitive grants to local governments to plan, design and build regional trails.

Key bond refinement activities completed in 2021:

- Compiled local knowledge and priorities for 39 regional trails listed in the bond measure from park providers, trail advocates and community members
- <u>Developed a tool to prioritize gaps</u> in the regional trail network for acquisition and refined it using feedback from partners and community members
- Led focused community engagement with BIPOC to revise and influence how factors were weighted in the trail prioritization tool according to relative priorities as expressed by the engagement participants, which helped shape priorities for trail gap acquisition. The summary report can be found on the Metro website.
- Developed a draft refinement plan that articulates a road map for trail acquisition
 priorities across 39 regional trails for Council approval in spring 2022. This refinement
 plan reflects priorities that were shared through community engagement with BIPOC
 and discussions with the region's park providers.
- Developed solicitation in fall 2021 for local government grants to plan and build regional trails

- Finalize a refinement plan that articulates a road map for trail acquisition priorities across 39 regional trails for Council approval in spring 2022
- Purchase land through the willing seller program where Metro and partners will one day build regional trails according to the refinement plan that reflects priorities from community and partner engagement shared in 2021.
- Solicit and review applications from local jurisdictions for trail grants, with grant awards expected to be made by the Metro Council in fall 2022

TAKE CARE OF METRO PARKS

\$98 million for safety and accessibility improvements at Metro parks and facilities across the region

Program description: Metro's regional parks, boat launches and cemeteries areas welcome nearly 2.5 million visitors a year to enjoy nature, exercise and cultural gatherings. The take care of Metro parks program funding is a promise to take care of Metro's existing sites by addressing capital maintenance, repair and improvement needs at Metro facilities and completing nature parks with adopted master plans.

Key bond refinement activities in 2021:

- Opened two new nature parks: <u>Newell Creek Canyon</u> in Oregon City and <u>Chehalem</u> <u>Ridge</u> south of Forest Grove
- Worked to advance health and safety improvements at Metro's sites like <u>Blue Lake</u>
 <u>Regional Park</u> and addressed barriers to meet or exceed Americans with Disabilities
 Act barriers
- Dedicated \$4 million to Lone Fir Cemetery's cultural heritage and memorial garden, also known as Block 14, to honor Chinese immigrants and patients from the Oregon Hospital for the Insane

- Complete a municipal water supply connection to Blue Lake Park and plan for the next phase of maintenance facility and utility improvements. Begin community engagement for Blue Lake Park renovation planning and design.
- Installation of a generator at the Oxbow Welcome Center and completion of maintenance area improvements as part of the Phase 2 of the welcome center and initiate assessment of Oxbow's potable water system for repair
- Continue to work with community members to advance a vision and design for a cultural heritage garden at Lone Fir cemetery honoring Chinese immigrants and patients from the Oregon Hospital for the Insane
- Continue to plan and prioritize bond funded projects to improve access that meet or exceed ADA standards at Metro parks and facilities across the region

LARGE-SCALE COMMUNITY VISIONS

\$50 million for green investments in regional transformative projects

Program description: The Metro Council created the large scale community visions program to fund regionally significant catalytic investments that re-green communities and connect parks and nature with other community assets such as transportation and affordable housing. \$20 million is set aside for the Willamette Falls Legacy Project.

Key bond refinement activities completed in 2021:

 Develop program criteria in alignment with what's already in the bond measure and additional considerations to ensure projects selected through this program match the policy direction set by the Metro Council

Key implementation activities in 2022

 Work with the Metro Council to finalize more detailed program parameters and guidance by spring 2022.

3. BOND FINANCIAL REPORTING

The committee will regularly review financial reports for the limited remaining money from the 2006 natural areas bond, capital investments from the parks and nature levy, and the 2019 parks and nature bond. Financial data is tracked by Metro's fiscal year, which goes from July 1 through June 30.

Metro issued the first round of bonds on April 21 2020. So far, Metro has issued \$200 million in bonds for the start of this 10-year program and has been able to take advantage of historically low interest rates and earn a return while preparing to spend in the form of a bond premium.

As of December 2021, Metro has spent \$18.3 million of bond proceeds available. Here is how spending breaks down by program area. More details about bond spending by program area can be found in the appendix.

Protect and restore land (including acquisitions): \$5.3 million

• Taking care of Metro parks: \$5.1 million

Local share: \$2.9 millionCapital grants: \$337k

Walking and biking trails: \$374k

• Large-scale community visions: \$43k

The focus on bond refinement for six new program areas over the last year has meant that bond spending overall appears low. Additionally, there are many administrative costs Metro

has had to incur to shape the programs. With little capital investment spent to date, the current administrative rate of 23 percent of total bond spending to date or \$4.17 million, is high.

As with other voter investments, administrative expenses tend to be highest in the first few years as new programs are being built. Once the programs are up and running, the administrative expenses as a percentage of total spending decrease significantly, before a small uptick in the last few years of the life of a bond measure. We fully expect administrative expenses with the 2019 parks and nature bond measure to do the same. The 2006 natural areas bond measure's administrative cost was under 10 percent of total spending and staff are committed to ensuring that the 2019 parks and nature bond to be close to that over the life of this bond measure.

Here are some of the specific projects and programs that have received bond investment from spring 2020 to December 2021. Note: some of these projects have received funding from several funding sources including the 2006 Natural Areas Bond, 2019 Parks and Nature Bond, and the parks and nature local-option levy:

- Acquisition to protect key parcels from the Sandy River Gorge to the Dairy McKay Creeks bordering Hillsboro totaling \$2,699,500. Most recently, Metro acquired two properties totaling 169 acres. Out at Killin Wetlands Nature Park, near Banks in Washington County, 52 acres were added to the natural area surrounding the park. And in the East Buttes area right on the Clackamas-Multnomah county line, 117 acres connect to the Sunshine Butte Natural Area. The property includes a hilltop where several small streams begin their way down to Johnson Creek. A complete list of all acquisition activities in this period can be found in the appendix on page 24.
- Local share funds for Gresham's acquisition of the Shaull property: \$2.5 million.
- Chehalem Ridge Nature Park, \$5.3 million: Chehalem Ridge Nature Park is just south of Forest Grove and is Metro's biggest park west of the Willamette River. The park has 10 miles of trails for hiking, biking and horseback riding.
- Newell Creek Canyon Nature Park, \$2.9 million: Newell Creek Canyon Nature Park, which is in the heart of Oregon City also opened in 2021. Newell Creek Canyon has 2.5 miles of hiking and walking trails and 2 miles of dedicated mountain biking trails.
- Blue Lake Regional Park utilities and facilities improvements, \$337k: The money that has been spent at Blue Lake is only the start of improvements and renovations at this beloved park. The work so far has focused on connecting the park's water system to the City of Fairview. In December 2021, staff put out a request for proposals on a contract to demolish and replace several buildings at the park, which will set up for additional park improvements that community members will help identify.
- Oxbow Regional Park health and safety improvements, \$296k: The biggest project so far at Oxbow is the replacement of a sanitation system.

COBID spending

Metro tracks the percentage of bond spending with minority owned, women owned and emerging small businesses that are certified with <u>Oregon's Certification Office for Business Inclusion and Diversity (COBID)</u>. In addition, Metro tracks the spending percentage with each type of COBID certification (minority owned, women owned and emerging small businesses, service-disabled veteran-owned).

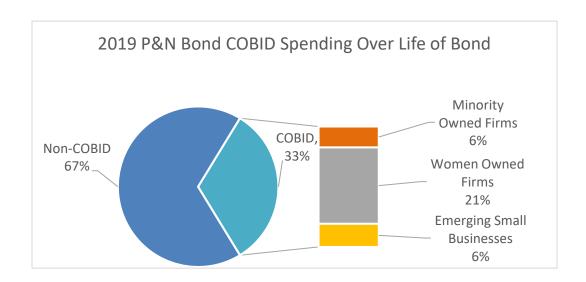

Metro's participation reporting method removes work that cannot reasonably be performed by a COBID-certified firms from the participation rate calculation. Metro excludes the following types of contracts and payments from the calculation:

- Services provided by another public agency that do not compete with the private sector
- Services for which there is a single or limited group of businesses, none of which are COBID-certified
- Services mandated by Oregon Law (Oregon Revised Statutes) to be provided by qualified rehabilitation facilities

Metro continues to identify, implement and evaluate strategies to increase the participation of COBID contractors for bond funded contracts in alignment with agency-wide priorities and protocol. In addition, staff will continue to explore ways for Metro and Parks and Nature to analyze and understand the COBID participation figures on a more granular basis including racial and other identity groups. Currently Metro may not have the tools to do so, but could learn from other agencies are doing.

Parks and nature bond COBID participation percentages from fiscal year 2019-20 to December 2021

Fiscal Year	2006 bond	2019 bond
FY20	32%	1%
FY21	14%	29%
FY22 YTD	59%	46%

2006 natural areas bond measure

Metro sold the remaining 2006 bonds in spring 2018. Remaining funds from the 2006 bond measure are close to being spent or are dedicated to upcoming projects or acquisitions. Staff will continue to provide the 2006 natural areas bond spending report to the oversight committee until funds are completely spent. The latest 2006 natural areas bond spending report can be found in the appendix on page 23.

Local-option levy

Metro's parks and nature local-option levy protects clean water, restores fish and wildlife habitat at natural areas across the region and connects people with nature across 17,000 acres of parks, trails and natural areas through investments in capital projects and programs. The Natural Areas Oversight Committee will review any capital investments supported by the levy. In the last calendar year, the levy did not fund any capital investments, but in future years, the committee can expect to review levy-funded capital projects at Metro's parks, trails and natural areas.

APPENDIX

BOND MEASURE PROGRAM CRITERIA

Community engagement and racial equity criteria

Investments in all program areas must satisfy all of the following community engagement and racial equity criteria:

- Meaningfully engage with communities of color, Indigenous communities, people with low incomes and other historically marginalized communities in planning, development and selection of projects.
- Prioritize projects and needs identified by communities of color, Indigenous communities, low-income and other historically marginalized groups.
- Demonstrate accountability for tracking outcomes and reporting impacts, particularly
 as they relate to communities of color, Indigenous communities, people with low
 incomes and other historically marginalized communities.
- Improve the accessibility and inclusiveness of developed parks.
- Include strategies to prevent or mitigate displacement and/or gentrification resulting from bond investments.
- Set aspirational goals for workforce diversity and use of COBID contractors and work to reduce barriers to achieving these goals; demonstrate accountability by tracking outcomes and reporting impacts.

Climate Resilience Criteria

All projects funded by the bond must identify at least one climate resilience criterion that the project will satisfy from among the following:

- Protect, connect and restore habitat to support strong populations of native plants, fish and wildlife that can adapt to a changing climate.
- Protect and restore floodplains, headwaters, streams and wetlands to increase their capacity to handle stormwater to protect vulnerable communities from flooding.
- Increase tree canopy in developed areas to reduce heat island effects.
- Use low-impact development practices and green infrastructure in project design and development.
- Invest in segments of the regional trail system to expand active transportation opportunities for commuting, recreation and other travel.

GLOSSARY

BIPOC: Abbreviation for Black, Indigenous, and people of color

COBID: Oregon's Certification Office for Business Inclusion and Diversity. The primary goal of certification is to level the playing field by providing certified firms a fair opportunity to compete for government contracts regardless of owner ethnicity, gender, disability or firm size.

Construction Career Pathways: Regional effort of public agencies teaming up with stakeholders from private industry, apprenticeship programs, unions and community-based organizations to provide reliable career pathways for women and Black, Indigenous, and people of color in the construction trades.

Refinement plans: Formal publically adopted road maps outlining strategies for land acquisition that reflect Council direction, community input and give Metro staff the guidance to protect habitat and land for future trails.

Bond refinement: The work to turn the 2019 parks and nature bond measure language into programs ready to invest in parks, trails and natural areas across the region.

BOND REFINEMENT COMMUNITY ENGAGEMENT SUMMARY, FEBRUARY 2022

Does not include Metro Council or tribal government engagement

Introduction

In November 2019, voters in greater Portland approved a \$475 million bond measure to further protect clean water, restore fish and wildlife habitat and provide opportunities for people to connect with nature close to home.

Much of the work to turn the parks and nature bond into programs ready to invest in our region's parks, trails and natural areas is on track to be complete by spring 2022. The investments from the 2019 bond measure will continue to strengthen our unique system with nature at its heart. The local share program is ready to make investments in parks, trails and natural areas in communities across the region, health and safety updates and renovation projects are underway at Blue Lake and Oxbow regional parks, and an application process is open for up to \$20 million in grants for local governments to plan and construct regional trails.

With this bond measure, the voters of the region asked us to do our work differently. That has meant listening and learning about the needs and priorities of communities who haven't benefited equitably from previous investments. Over the last year, communities across the region have participated in meaningful engagement that staff have designed to meet the following core values:

- Center BIPOC communities in development of bond programs and prioritization of bond investments
- Increase transparency of and access to bond decision-making
- Increase access to engagement opportunities

The feedback collected in the last year from community members and partners has helped shape bond programs that protect clean water, restore fish and wildlife habitat and provide access to nature. In addition, the feedback captured will be instrumental in informing work across the parks and nature portfolio from community grants to restoration work.

Initial reflections from engagement planning and execution

- Setting clear expectations about what participants can influence, and acknowledging feedback even if it's outside the scope of the topic at hand increases transparency and can build trust
- Capturing and reporting back on feedback through follow up sessions with the same stakeholders can create stronger relationships with partners and increase interest in participation. Many community members participated in multiple engagement activities across bond programs from 2021-2022.

- Organizing focused events tailored to specific audiences can help build more meaningful and productive engagements
- It will be important for Parks and Nature staff to continue engaging with and building relationships with those who participated in engagement activities over the last year to continue to help shape future bond investments where there are opportunities to do so.

ENGAGEMENT ACTIVITIES BY PROGRAM AREA THROUGH JANUARY 2022

Note: engagement reporting described below can be found at the Metro website.

Bond program	Goals for engagement during refinement	Engagement work complete to date.	How engagement has shaped the bond programs and parks and nature
Protect and restore land www.oregonmetro.gov/public-projects/parks-and-nature-bond-measure/protect-and-restore-land (engaged conservation partners, park providers, urban Indigenous community, tribal governments, BIPOC community members, people with disabilities)	Community and partner review of acquisition strategies for each of the 24 target areas before Metro Council approval Nurture authentic partnership with urban Indigenous community cohort throughout the refinement process Continue to work with conservation partners on information collection Include goals and priorities from BIPOC communities into refinement plans	 100 community members and partners participated across three engagement sessions to review acquisition strategies in winter 2022 At least six meetings with urban Indigenous community on data and format for ecological assessments of 24 target areas Hosted 6 affinity group roundtables for BIPOC and people with disabilities in fall 2021 (with over 100 participants) and 2 follow up sessions in winter 2022 (with 60 participants) Interviews with 129 individuals representing 59 organizations including park providers and watershed councils 	 Data collected to understand each of the 24 target areas in the bond measure expanded to include stream daylighting/inline pond removal, pollution/toxins/water quality data, among others Acquisition strategies for the 24 target areas reflect information and local knowledge shared from partners and community members Environmental justice analysis that reflects the priorities of BIPOC and people with disabilities provided additional context to target area refinement plans

		• Two information sessions with over 70 participants in fall 2021	
Local share www.oregonmetro.gov/tools- partners/grants-and- resources/local-share (engaged the region's 27 park providers)	Ensure program materials reflect needs and concerns raised by park providers Support park providers in identifying project priorities that meet bond criteria Build spaces for collaboration between Metro and park providers	 Development of local share program materials Hosted 6 roundtables for staff from region's park providers Shared bond updates at 7 quarterly park directors meetings At least one meeting with most of the 27 park providers across the region around project priorities 	 Local share projects submitted and more on the way Lessons learned around strategies to meet bond criteria help shape park providers' local share project identification processes Increased connections across park providers
Walking and biking trails (engaged with the region's park providers, trail advocates and BIPOC community members)	Build relationships with BIPOC community members around needs and priorities for regional trails Ensure that up to \$20 million for grant program to plan and build regional trails has a solicitation process that reflects partner input	 Two focused community sessions with over 100 BIPOC community members to provide input on what factors are most important for trail projects and 88 participants responded to a follow up survey Five open houses in fall 2021 with 100 participants across the sessions to share information and collect feedback about priorities for trail acquisition 127 individuals responded to a survey to collect feedback on draft priorities for trail acquisition 	 Tool to help prioritize trail gap acquisitions weights factors according to the relative priorities expressed by BIPOC Prioritization tool was refined with additional feedback from park providers, trail advocates and the general community Final prioritization of hundreds of trail segments will reflect priorities and feedback from community

		 Meetings with each 27 park providers and local jurisdictions about priorities for regional trails Performance evaluation work group with park provider staff and community members to help shape a grant solicitation for trail projects in fall 2021 Two information sessions with over 70 participants in fall 2021 	
Capital grants www.oregonmetro.gov/tools- partners/grants-and- resources/nature- grants/capital-grants/capital- grants-pilot (engaging with pilot committee)	Test participatory budgeting principles through development of pilot to allocate \$4 million to community projects selected through a community process and vote Recruit a capital grants pilot design and review committee that reflects the diversity of the region and the requirements laid out in the bond measure	 2 info sessions on committee recruitment in fall 2021 Partnering with community organizations and individuals to spread the word about the committee recruitment 44 completed applications received of which 7 were selected to serve on the committee Convene review panel of Metro staff and community members to evaluate applications received 	 Initial capital grants pilot design and review committee established as a result of recommendation from review panel Capital grants pilot design and review committee will shape pilot guidebook and idea generating sessions, which will determine path for community project
Take care of Metro parks	Advance safety, health and accessibility projects that reflect feedback from community during bond	 Reviewed and analyzed feedback during bond development Planning to convene a BIPOC partner cohort to help shape the 	

development to "take care of what we have"

Ensure that major projects at specific Metro sites like Blue Lake and Oxbow regional parks are shaped by community members

renovation planning at Blue Lake Park

Partnership with Lone Fir Foundation around the project scope and planning for engagement with new partners including the Oregon Chinese Consolidated Benevolent Association, the Mental Health Association of Portland, the Chinese American Citizens Alliance, the Buckman Neighborhood Association, Friends of Lone Fir, the Oregon Chinese Coalition and the Portland Chinatown History Foundation to advance a concept for the cultural heritage garden at Block 14

ACQUISITIONS

The following chart lists all land acquisitions made with 2019 bond funds between spring 2020 and December 2021. In early 2020, the Metro Council directed staff continue to buy properties that come once in a generation and that meet the bond's criteria during the refinement period for the 2019 bond measure. In this time period, no funds from the 2006 natural areas bond measure were used for land acquisition.

Related Site	Target Area	Price	Close Date	Acres	County	Highlights
	Sandy River	\$350,000	9/8/2020	86.76	Multnomah	Purchase of this 86-acre property protects
Kingfisher Natural Area						highly productive native fish habitat on both
(S 04.08)						sides of Trout Creek, a tributary to the
						Sandy River, and expands the size of the
						Kingfisher Natural area to almost 127
						acres. The property is part of an important
						corridor for Roosevelt elk which move
						through the very large tract of public
						ownership which extends for several miles
						up the Sandy River. This acquisition also
						protects wetlands, riparian areas, and is
						known to contain culturally important
						native plants.
Gabbert Butte Natural	East Buttes	\$340,000	12/8/2020	8.59	Multnomah	This property contains significant forested
Area (S 02.07)						habitat, and purchase of this property
						closes an important gap in public ownership
						along Butler Ridge, which will benefit
						species that require larger protected habitat
						patches. The property also contains 815
						feet of Heiney Creek, a seasonal tributary of
						Johnson Creek, and protection will
						contribute to improved water quality.

West Council Creek (S 07.03)	Dairy and McKay Creeks	\$9,000	2/10/2021	5.21	Washington	Purchase of this property closes a gap and connects East and West Council Creek Natural Areas, creating a connected habitat corridor along Council Creek that is 54 acres in size. This property also contains 850 feet of both banks of Council Creek, a significant tributary of Dairy Creek, and protects important riparian and wetland habitat within the target area which will contribute to improved water quality in the Tualatin River.
Killin Wetlands Nature Park (S 56.01)	Killin Wetlands	\$465,000	11/24/2021	52.28	Washington	The acquisition of this 52 acre property protects a critical portion of Killin Wetlands, one of the Willamette Valley's largest remaining peat soil wetlands, and adds to Metro's existing 590-acre natural area. Acquiring this property protects scrub-shrub and open water wetlands as well as upland habitat that support a variety of native species including waterfowl and water birds, raptors, resident and migratory songbirds, land and amphibious mammals such as American beaver and river otter, and amphibians and reptiles such as Western pond turtle. Upland areas of the property that were farmed provide opportunities to restore upland prairie and oak savanna in the future.

Sunshine Butte (S 02.09)	East Buttes	\$1,422,000	12/9/2021	117.09	Clackamas	The purchase of this 117 acre parcel on
						Sunshine Butte immediately south of
						Gresham protects the uppermost
						headwaters of Sunshine Creek and Hogan
						Creek as well as multiple smaller tributaries.
						The property is immediately adjacent to the
						85-acre Sunshine Butte Natural Area and
						more than doubles its size to over 202
						acres. This property aligns with goals for
						the East Buttes target area by further
						protecting remaining undeveloped wooded
						slopes of extinct lava domes, water quality
						and connecting natural areas for wildlife
						habitat and corridors.
