

Oregon Transportation Commission Office of the Director, MS 11 355 Capitol St NE Salem, OR 97301-3871

**DATE:** June 30, 2022

**TO:** Oregon Transportation Commission

Kinthe W. Stin

FROM:

Kristopher W. Strickler Director

**SUBJECT:** Agenda Item L – Annual STIP Adjustment

#### **Requested Action:**

Approve the attached list of added, modified, or canceled projects to the STIP.

#### **Background:**

Previously, when new project opportunities arose, actions were taken on a project-by-project basis. This was not efficient as it increased the number of amendments approved by the OTC, the Director, or the Delivery & Operations Division Administrator.

At the July 15, 2021 Oregon Transportation Commission meeting, a new proposed yearly OTC approval process was presented for an annual approval of the majority of STIP amendments. The OTC approved the new process. And in September 2021, the OTC approved the first annual STIP amendment.

This is the 2022 annual amendment. The attached list of added, modified, or canceled projects for the 21-24 STIP consists of the highest priority projects for each region (as determined by the region). These projects will be paid for with pre-determined funding reserves and/or the additional funding from the Infrastructure Investments and Jobs Act (IIJA).

In accordance with Governor Brown's Executive Order on Climate (EO 20-04), the Climate Office analyzed the 2022 STIP adjustments, assessing changes in climate outcomes. A majority of projects address increasing costs due to inflationary pressures. An additional set contain newly scoped project features or new projects. These funding decisions were assessed for whether their impact would be positive, neutral, or challenging towards ODOT's climate goals.

This process informs and monitors STIP decisions as the climate lens was applied to the 24-27 STIP and March 2022 Infrastructure Investment and Jobs Act (IIJA) funding allocation decisions, using the 2021-24 STIP as a baseline. More information on these results and the associated methodology can be found in Attachment 2.

Oregon Transportation Commission June 30, 2022 Page 2

# <u>Next Steps:</u>

With approval, ODOT will add, modify or cancel the attached projects in the 21-24 STIP.

Without approval, the OTC, Director, or Delivery & Operations Division Administrator will review and act upon each project as a separate amendment.

#### Applying Climate Lens to the 2022 Annual STIP Adjustment

In accordance with Governor Brown's Executive Order on Climate (EO 20-04), the ODOT Climate Office reviewed the 2022 STIP adjustments (May 2022 and July 2022 Annual) using the climate lens. This document provides high-level observations from that analysis. The annual adjustment contains amendments to nearly 80 existing and new projects that will be added to the 21-24 STIP.

#### Scope of Analysis

The analysis observations below are based on the Climate Office review of this limited subset of projects, not the full 2021-2024 STIP. The May 2022 Adjustment (with primarily Infrastructure Investment and Jobs Act (IIJA) funds) and the July Annual STIP amendments are 17% of the 21-24 STIP funding representing \$211M in new funds added to a \$426M base for these projects. These funding decisions were assessed for whether their impact would be positive, neutral, or challenging towards ODOT's climate goals. A majority of project adjustments address increasing costs due to inflationary pressures. An additional set are newly scoped project features, including \$47M in new projects.

#### Process

Staff assessed each project using 23 identified project attributes that tie to seven priority outcome areas (listed below) and assigned a dollar value to each based on its portion of the total project.

Several of the projects included multiple attributes. For example, a bridge project that adds capacity might be rated as positive for congestion relief, while its design standards also support Climate Adaptation/Resilience outcomes, and the project has new bike lanes and addresses a Safety issue. Each attribute is credited, proportional to the cost of that attribute, toward the associated outcomes. The priority outcome areas are:

- Climate—GHG Emissions Reduction/Mitigation
- Climate—Adaptation/Resilience
- Congestion Relief
- Social Equity
- Multimodal Mobility
- Safety
- State of Good Repair

This process informs and monitors STIP decisions as the climate lens was applied to the 24-27 STIP and March 2022 primarily Infrastructure Investment and Jobs Act (IIJA) funding allocation decisions, using the 2021-24 STIP as a baseline. Some variability from year to year is expected based on project timing changes.

## **Results: Key Climate Observations**

The 2022 STIP adjustments will result in a net increase of \$211 million programmed project funding: \$59M in May, \$152M in July once approved. The rough return on investment calculation, based on projected outcomes and cobenefits anticipated, shows that these investments will generate \$454 million of new benefits when we look at cobenefits across outcome areas: \$93M in May, \$361 in July. The May projects show a smaller net return, as some of the projects' benefits are offset by investments that may contribute to more emissions.

**Climate Adaptation/Resilience** 

Climate Adaptation/Resilience will see 12% of \$454M projected new benefits.

These include investments in bridges and culverts in nearly all regions, including a fish passage structure with greater environmental and resilience outcomes over a standard culvert in the same location.

Later in 2022, a new Climate Hazard Mapping system will increase the agency's ability to identify priority locations for climate resiliency projects.

#### Climate Greenhouse Gas Emissions Reduction/Mitigation

GHG Emissions Reduction/Mitigation will see 6% of \$454M projected new benefits.

Several projects improve high priority Active Transportation Needs Inventory (ATNI) corridor segments for bicycling and ADA usage, and benefit areas with high equity populations.

These gains are offset by nearly \$40M in additional funding for six larger roadway enhancement projects.
