

# Regional Investment Strategy: Update

Council work session  
March 12, 2019

Metro

# Parks & Nature bond

Lots of engagement:  
Community, local partners

Stakeholder Table  
reconvenes

Public opinion research

Council work sessions,  
3/19 and 4/2

Broader engagement

# Housing bond implementation

Oversight Committee

Phase One project resolution

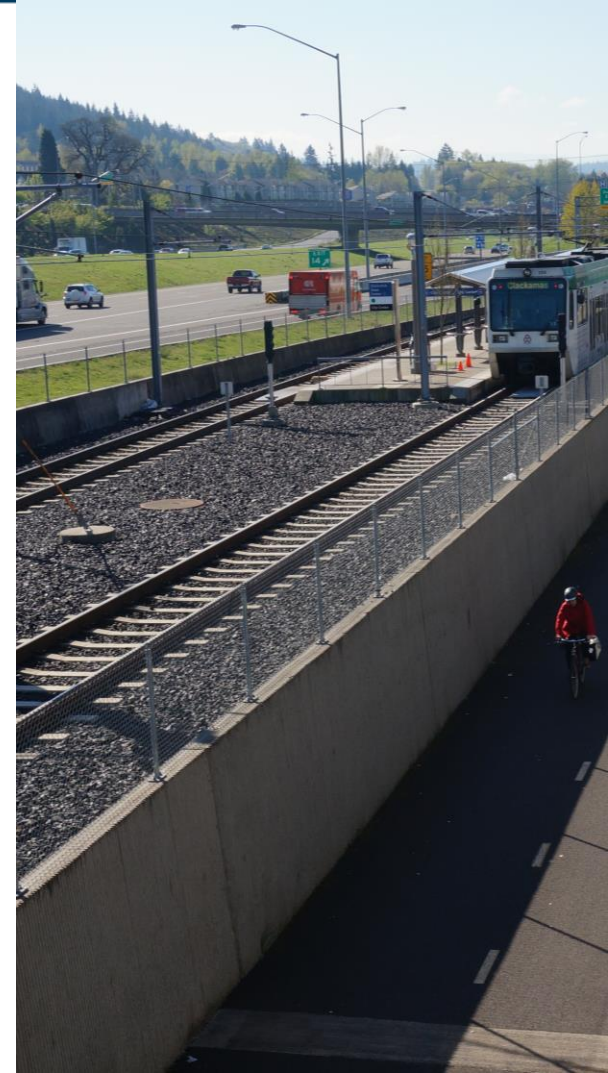

# Transportation measure

Task Force begins work –  
Values, Racial equity,  
Council direction

Presenting around region

Talking Corridors

# Introducing corridors

We all have places  
we start from...

...and places we're  
trying to go...

...with a journey in  
between.

We're not alone in  
our trips...

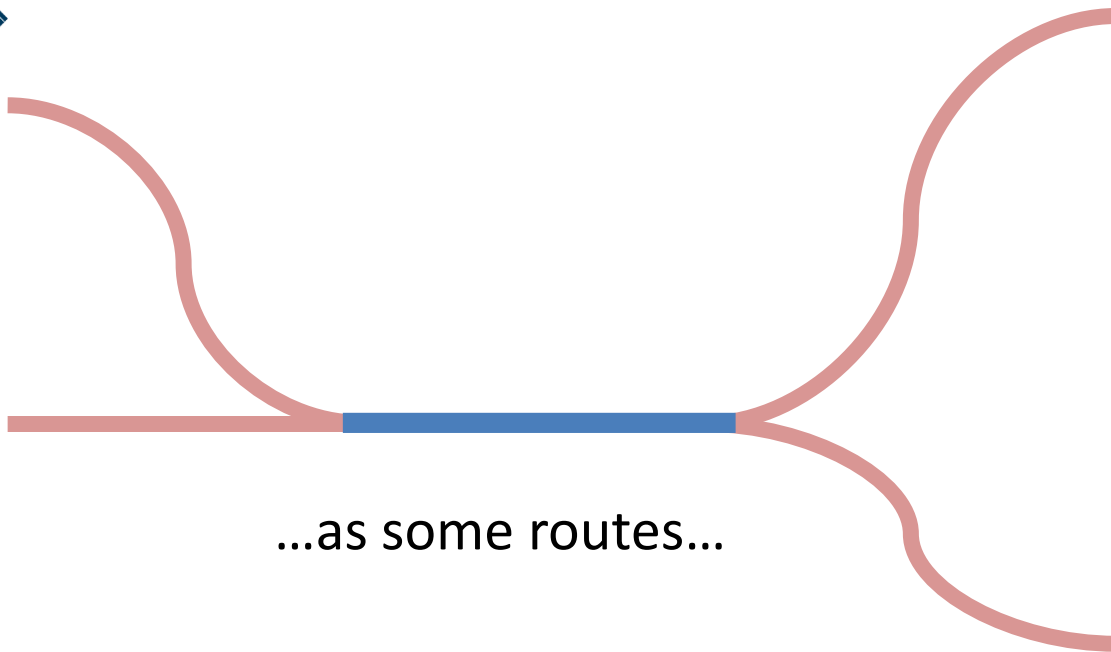

...as other people  
in our region have  
places to go.

Our journeys  
can overlap...

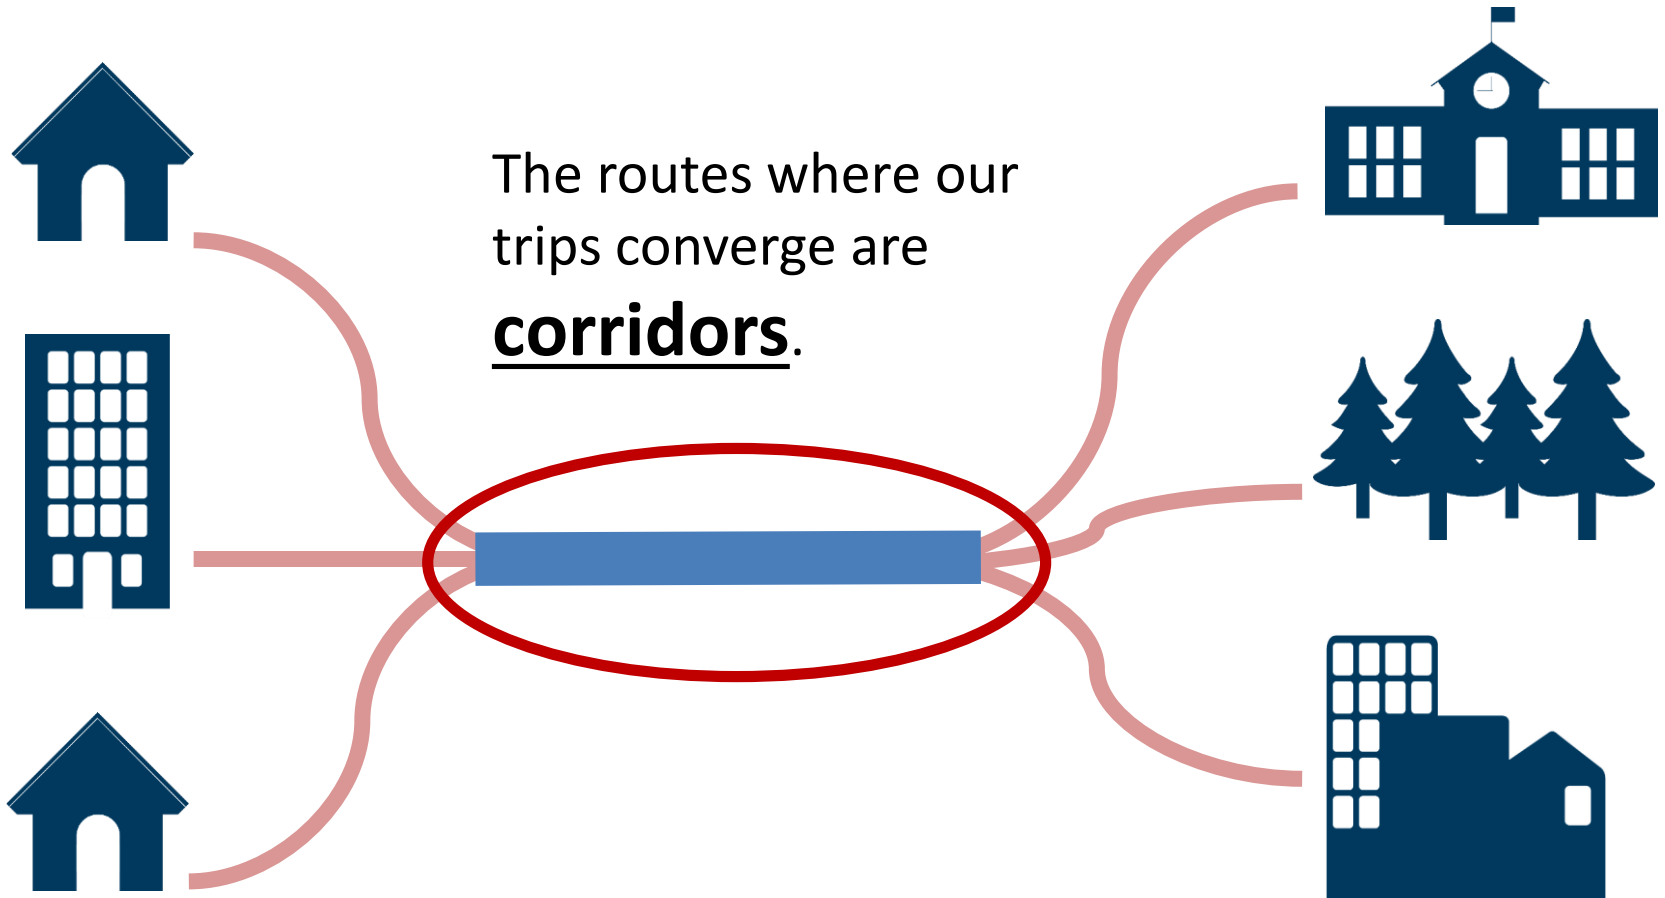

...as some routes...

...present the quickest  
and most direct way to  
get to our destinations.

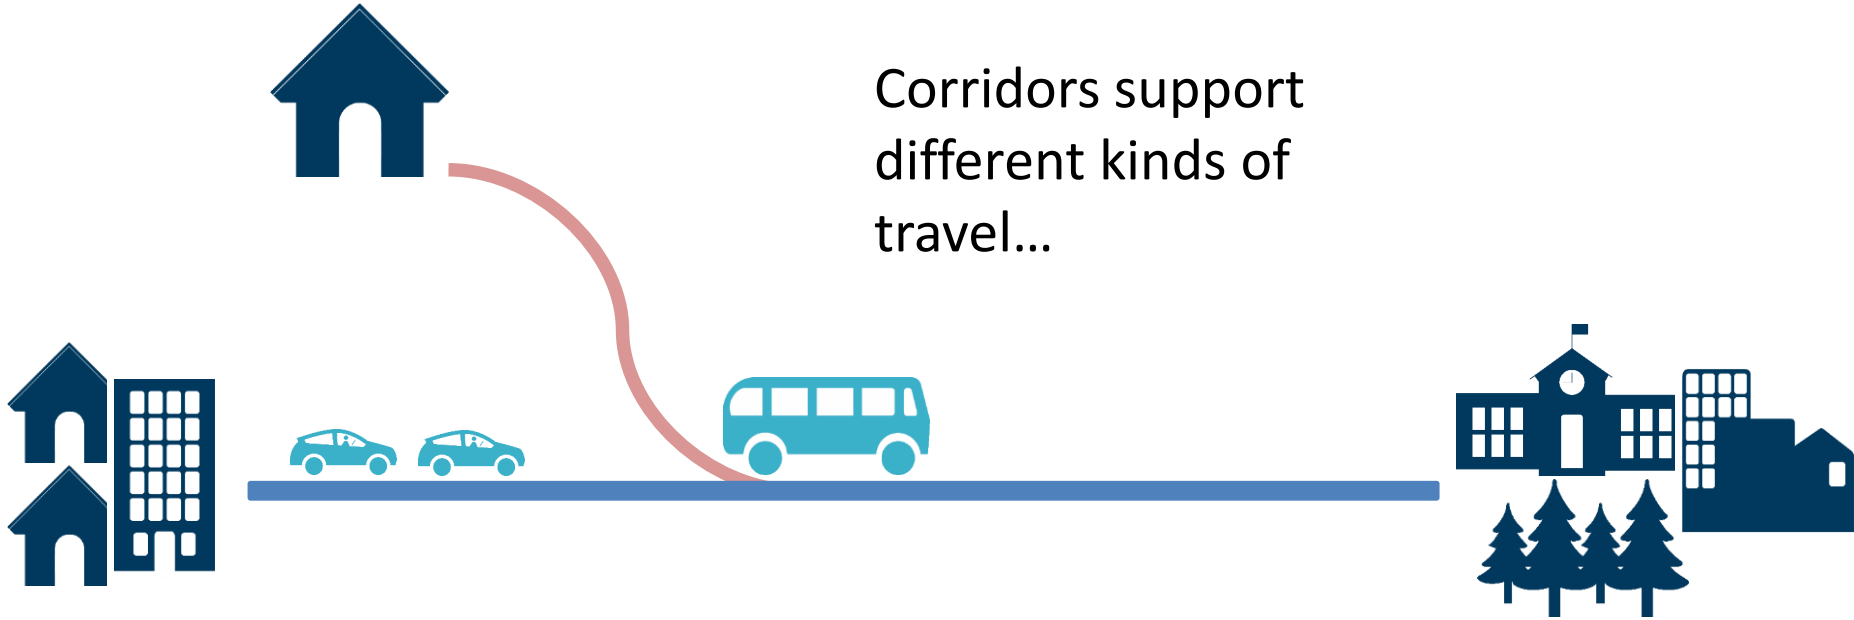

Corridors are  
not just  
roadways...

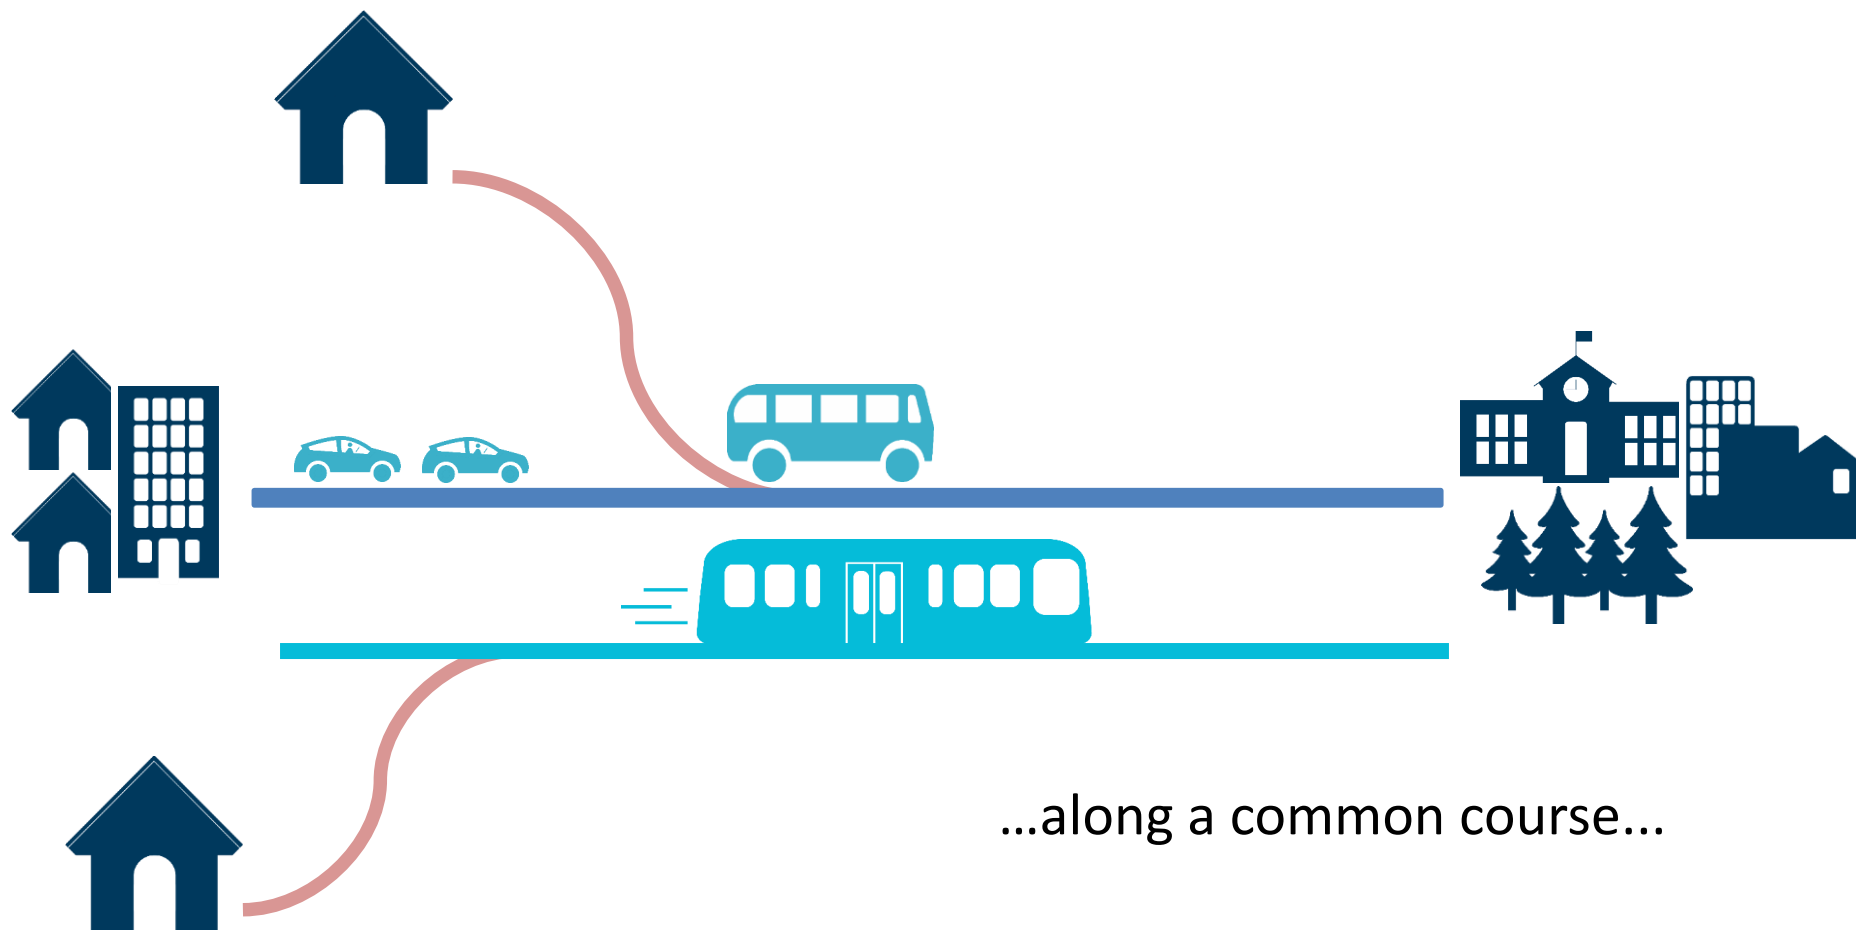

...that serve cars from  
point A to point B.

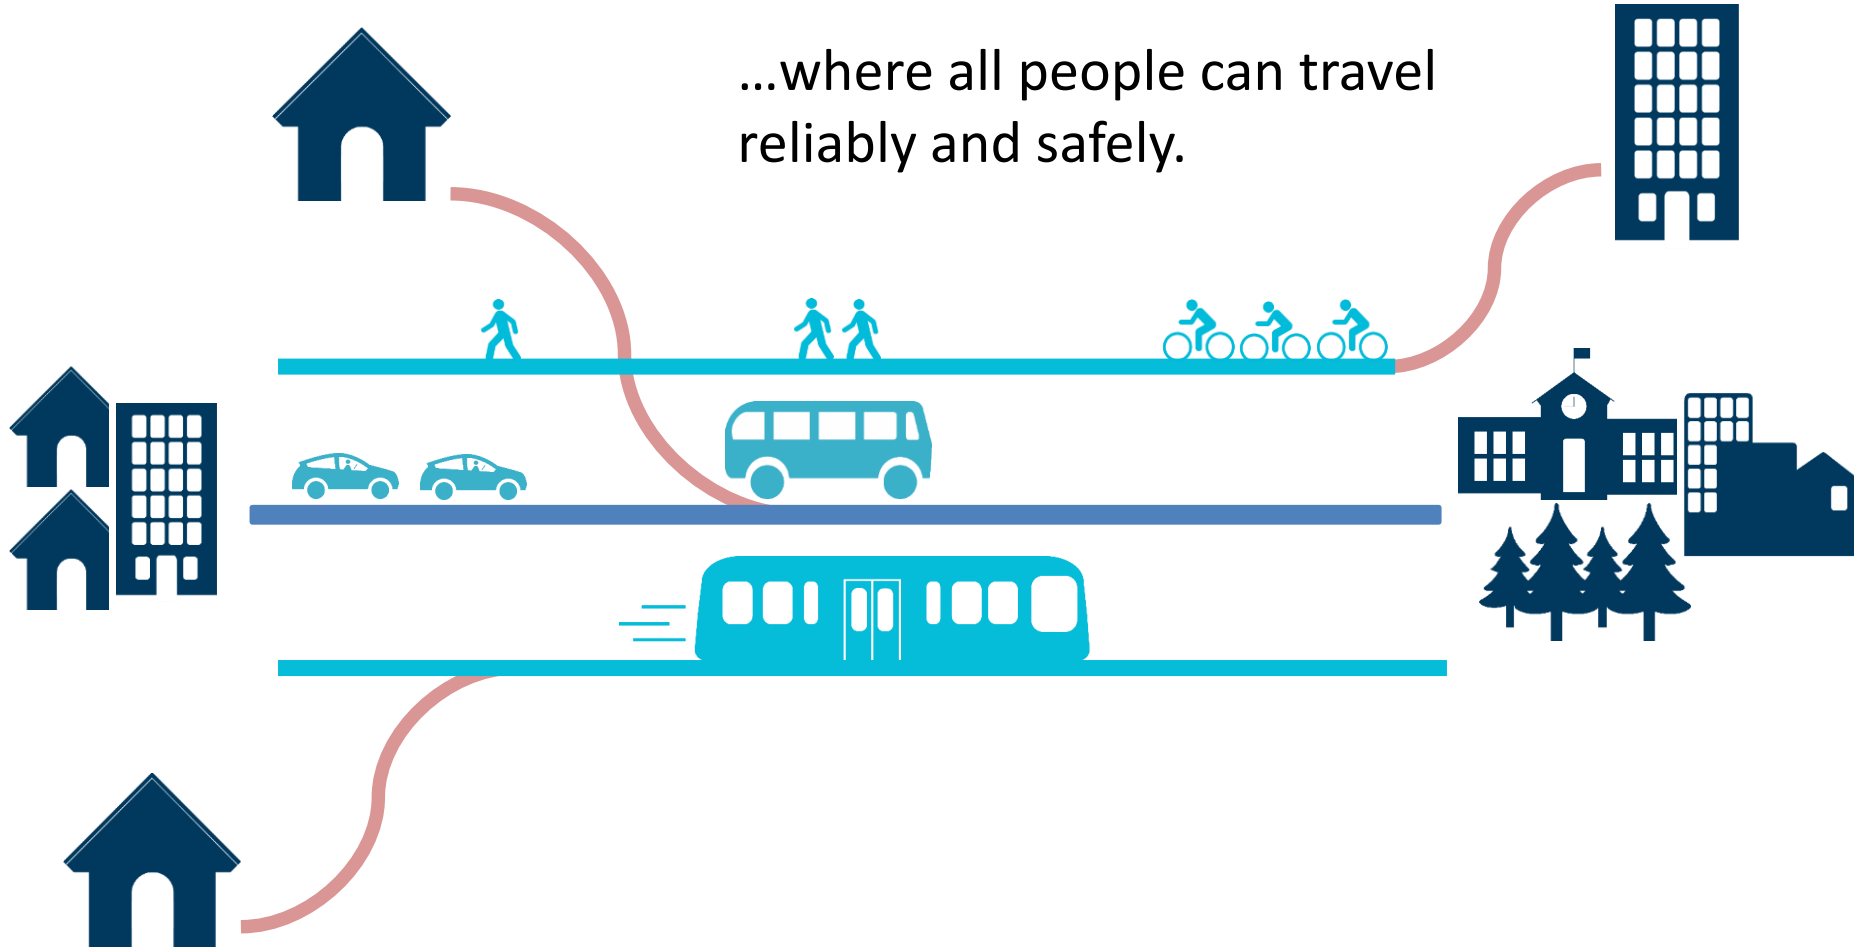

Corridors support  
different kinds of  
travel...

...where all people can travel  
reliably and safely.

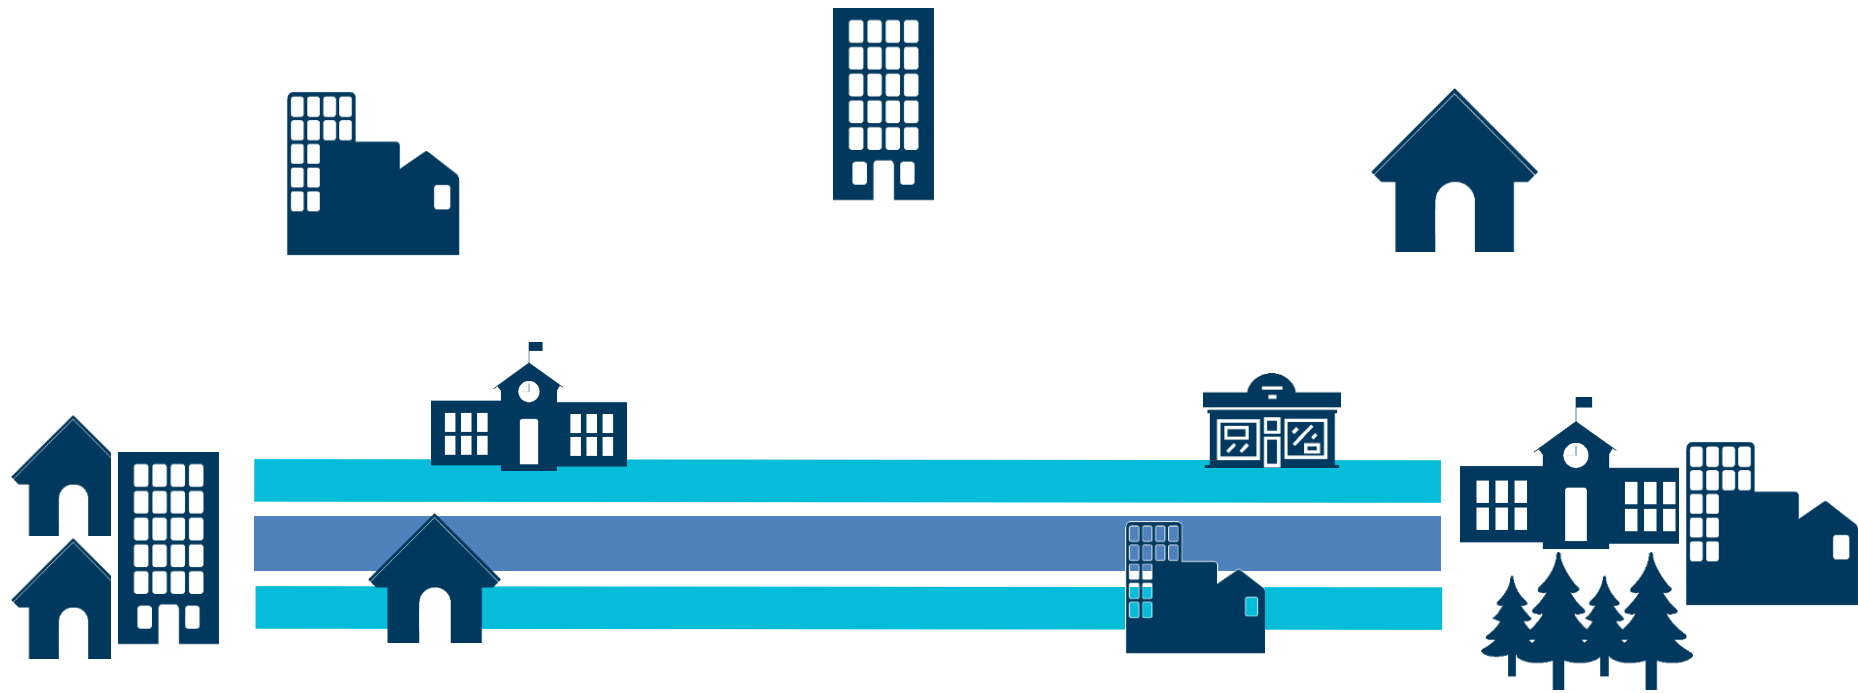

Our trips converge...

...in corridors across the region.

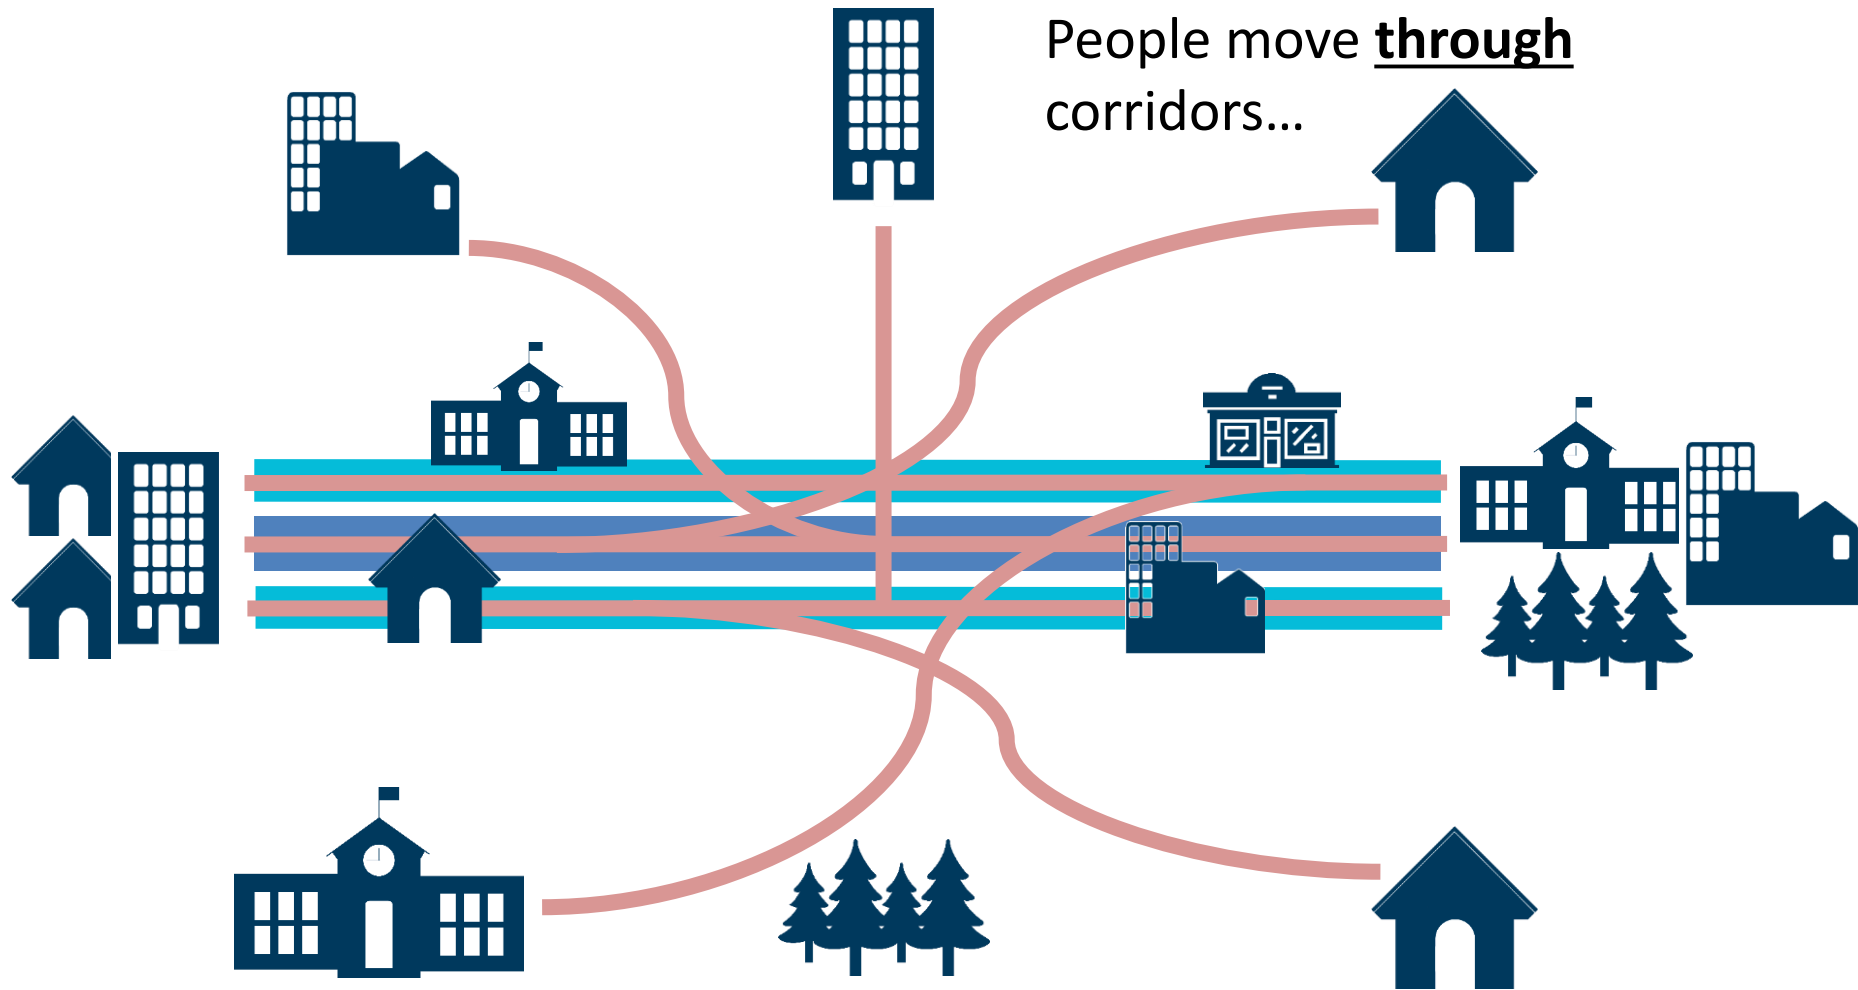

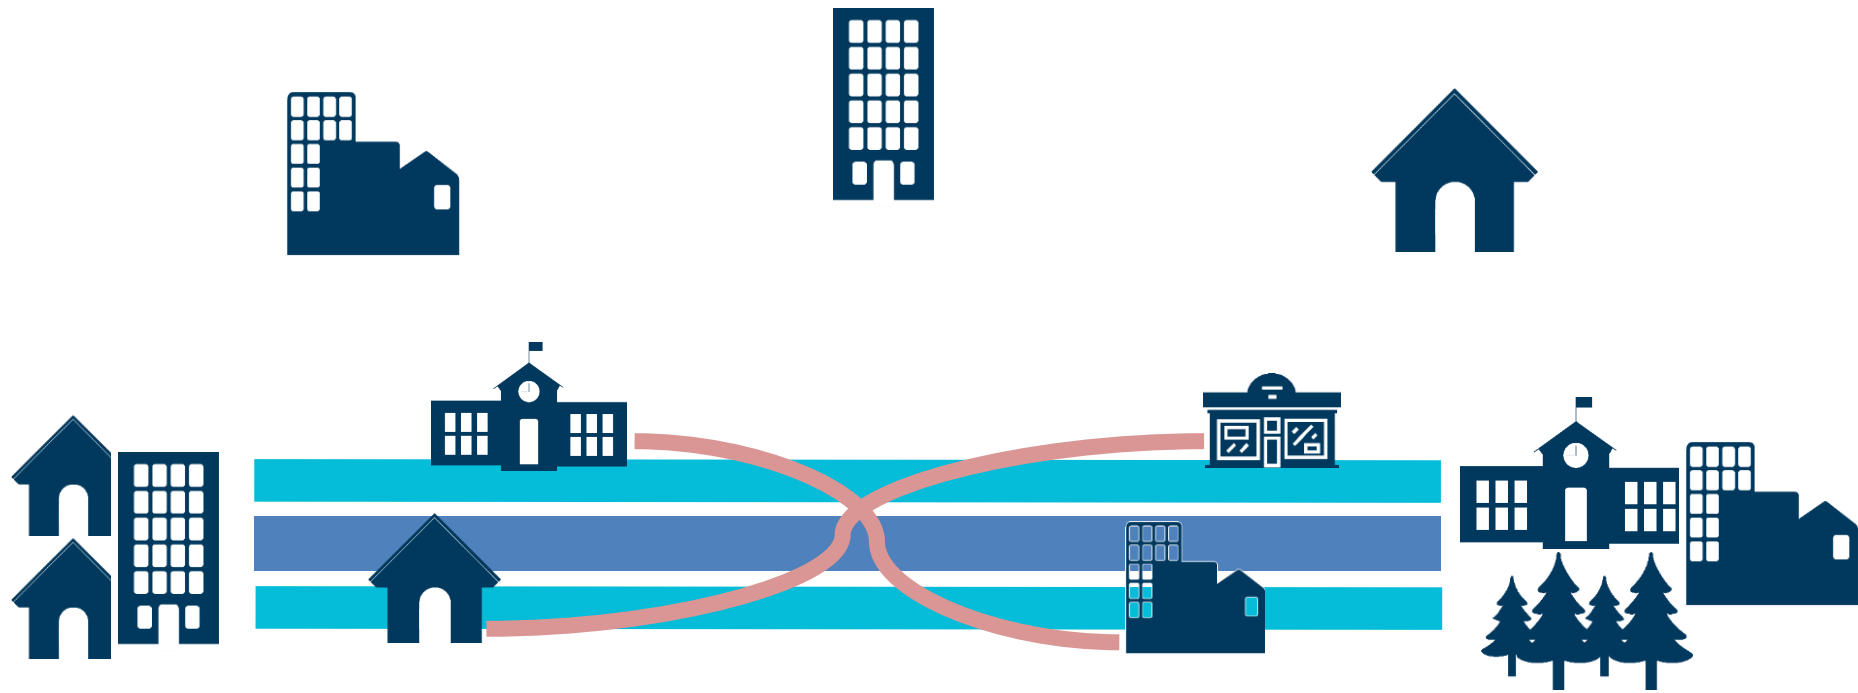

**Corridors are part of communities.**

People move through  
corridors...

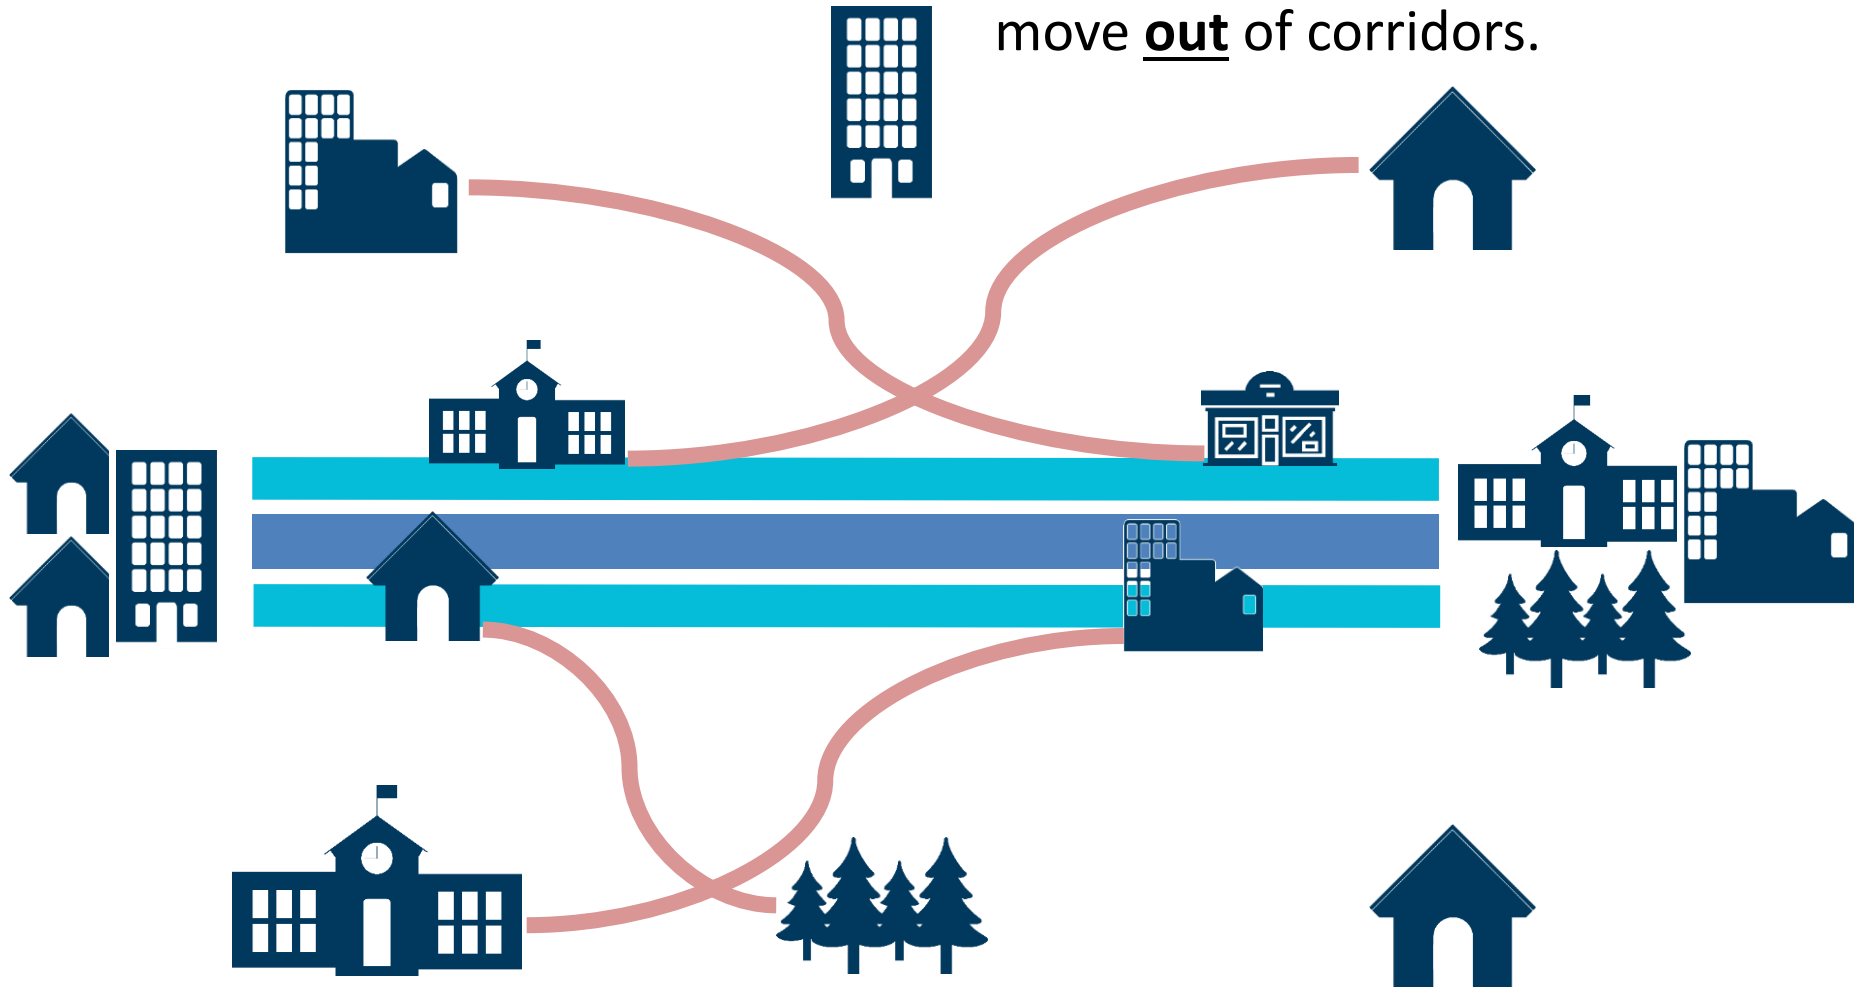

...people move within corridors...

...and people start in and move out of corridors.

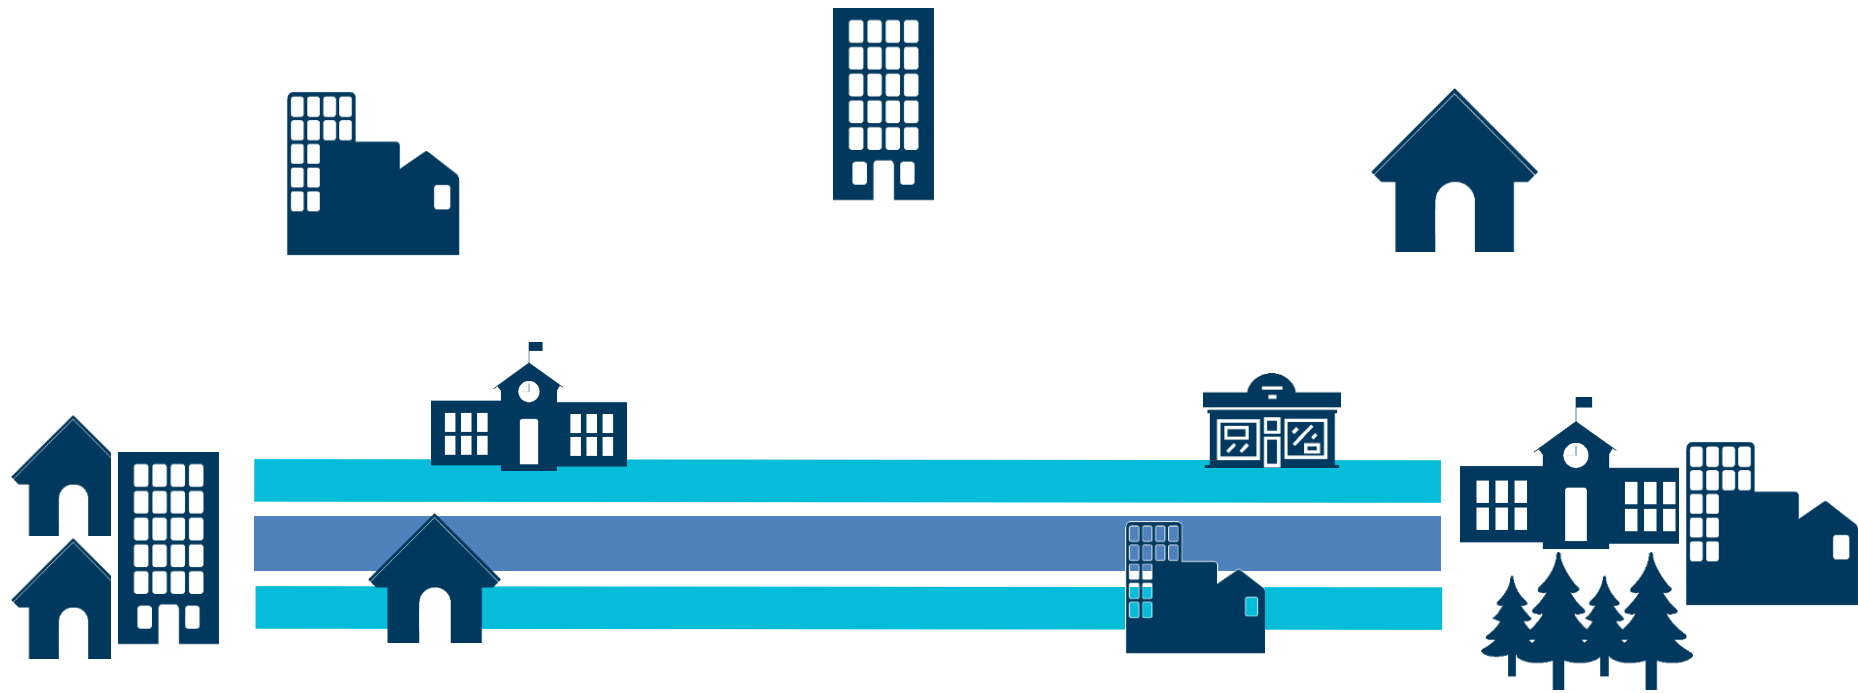

As growth continues...

...and more people move here...

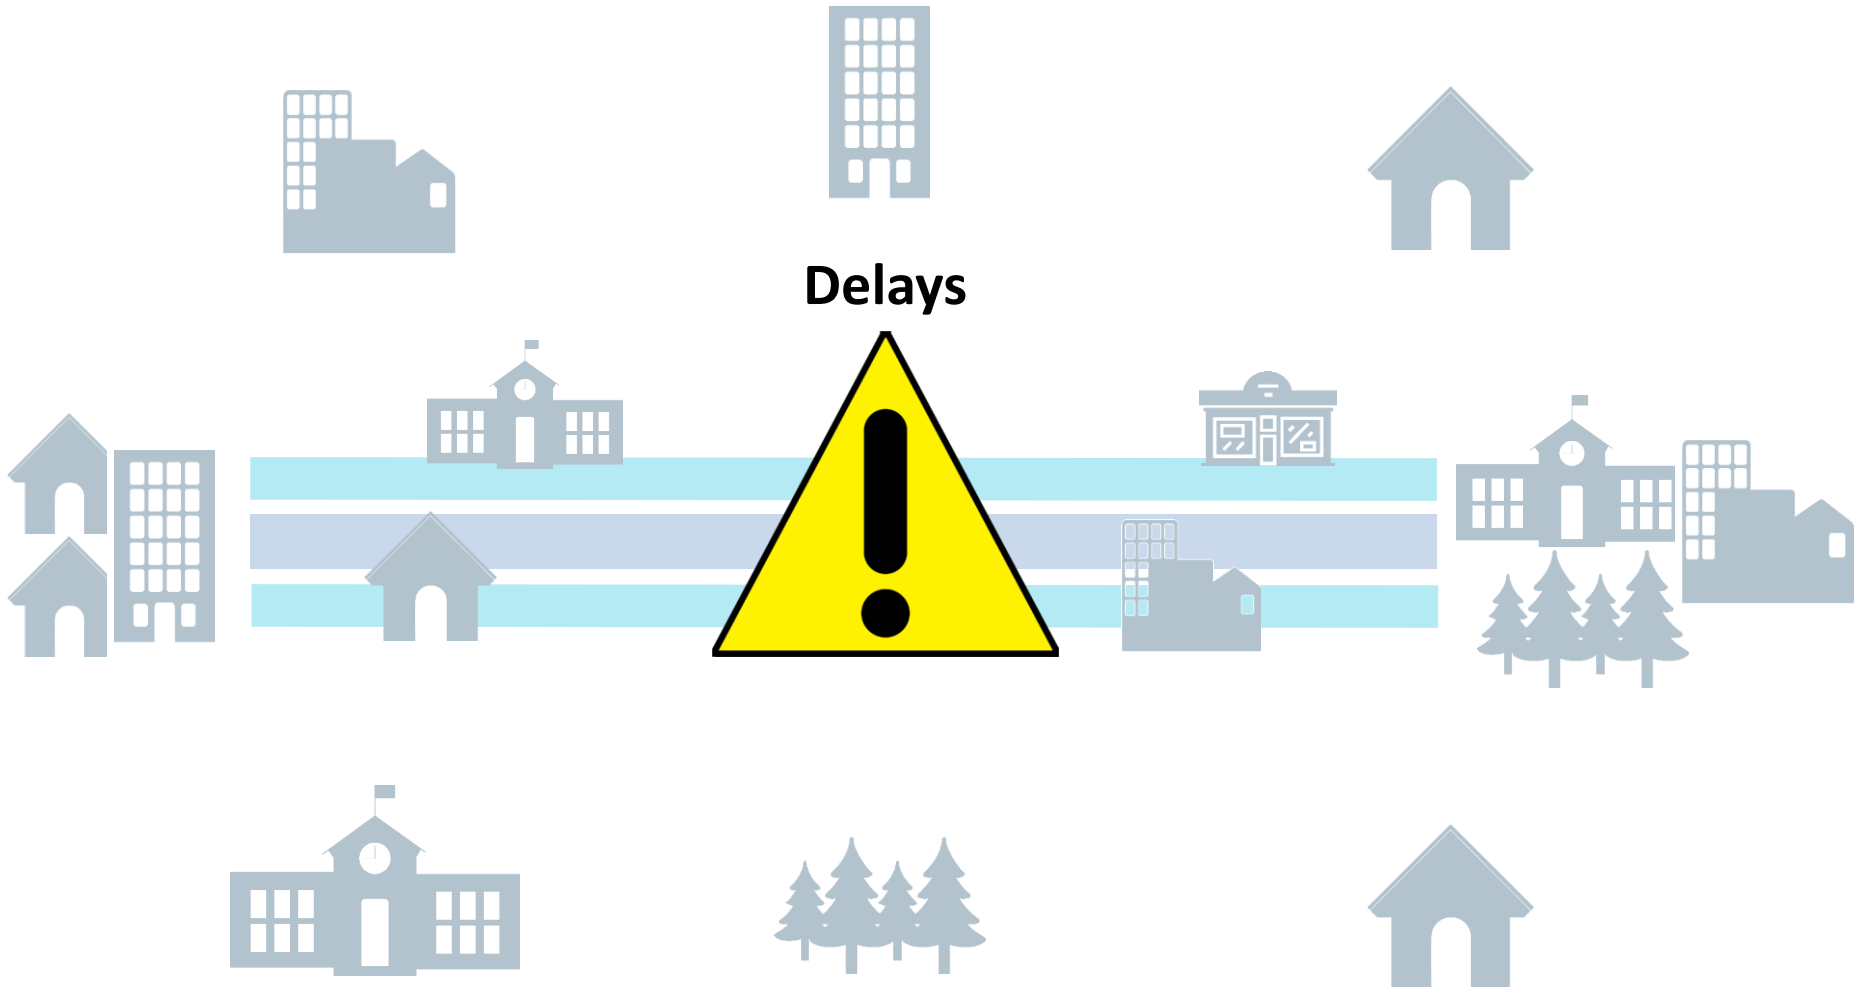

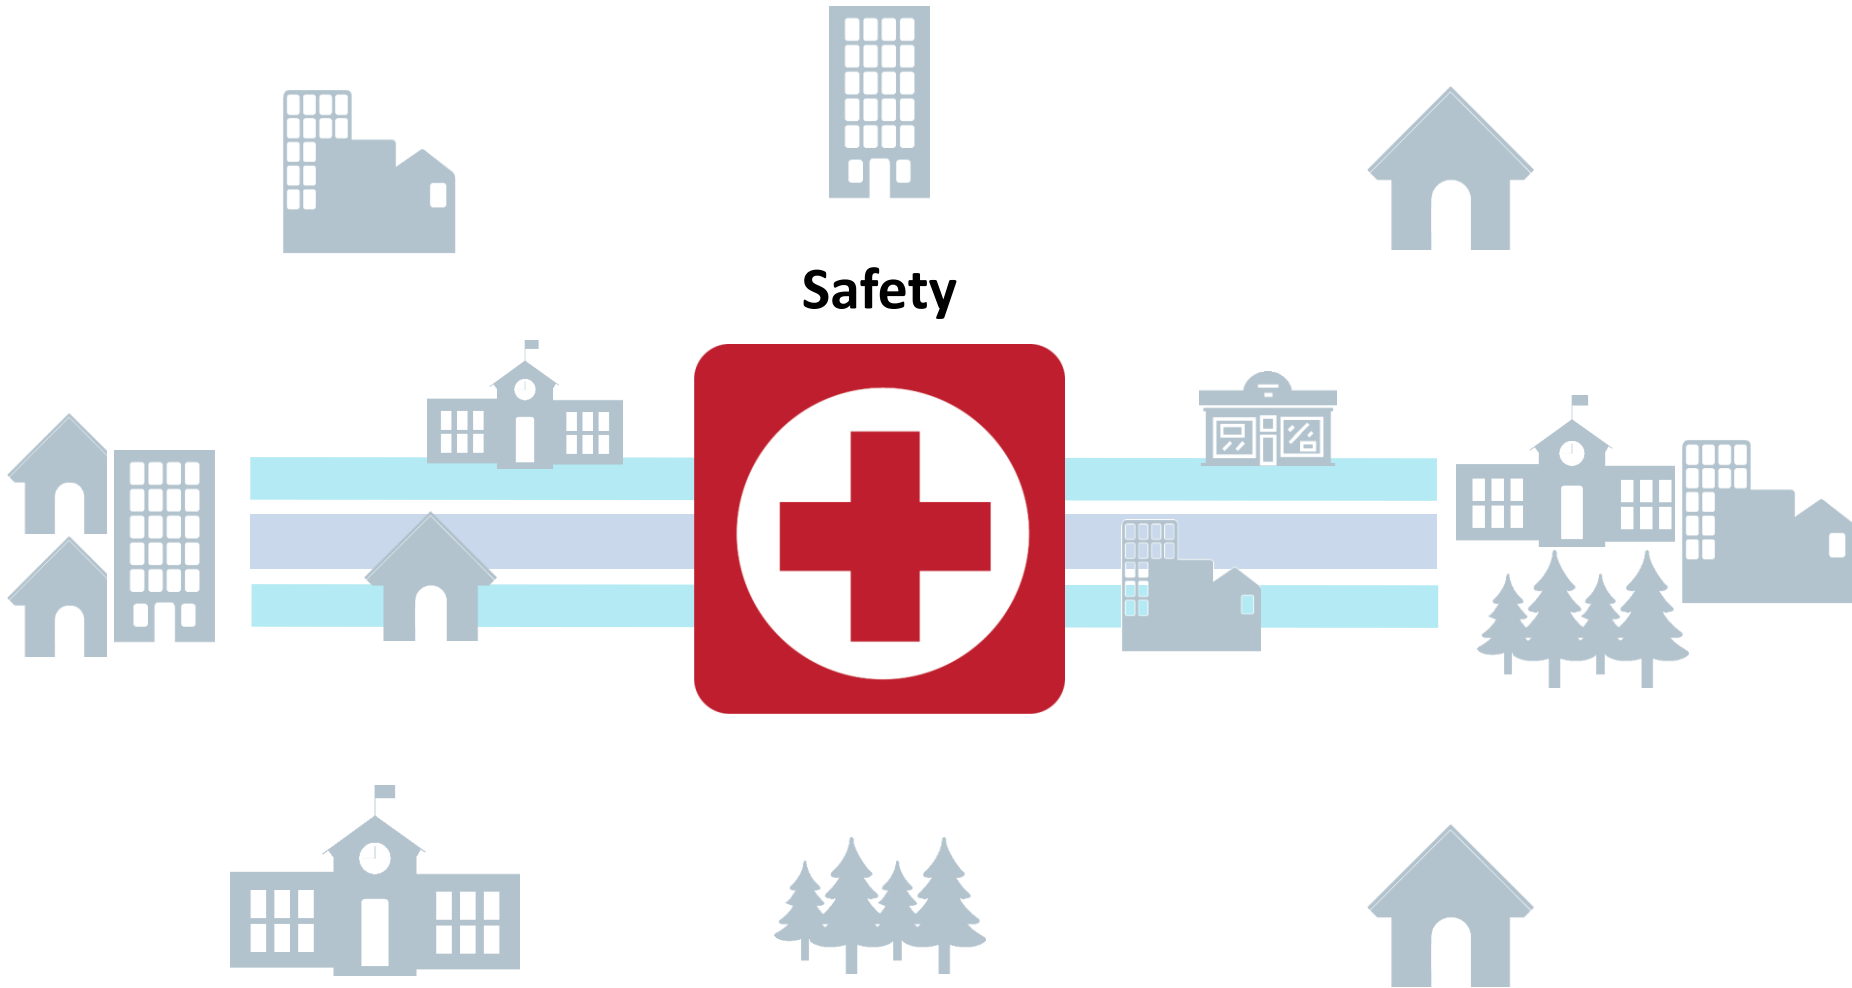

...corridors are getting busier.  
This has impacts.

**Delays**

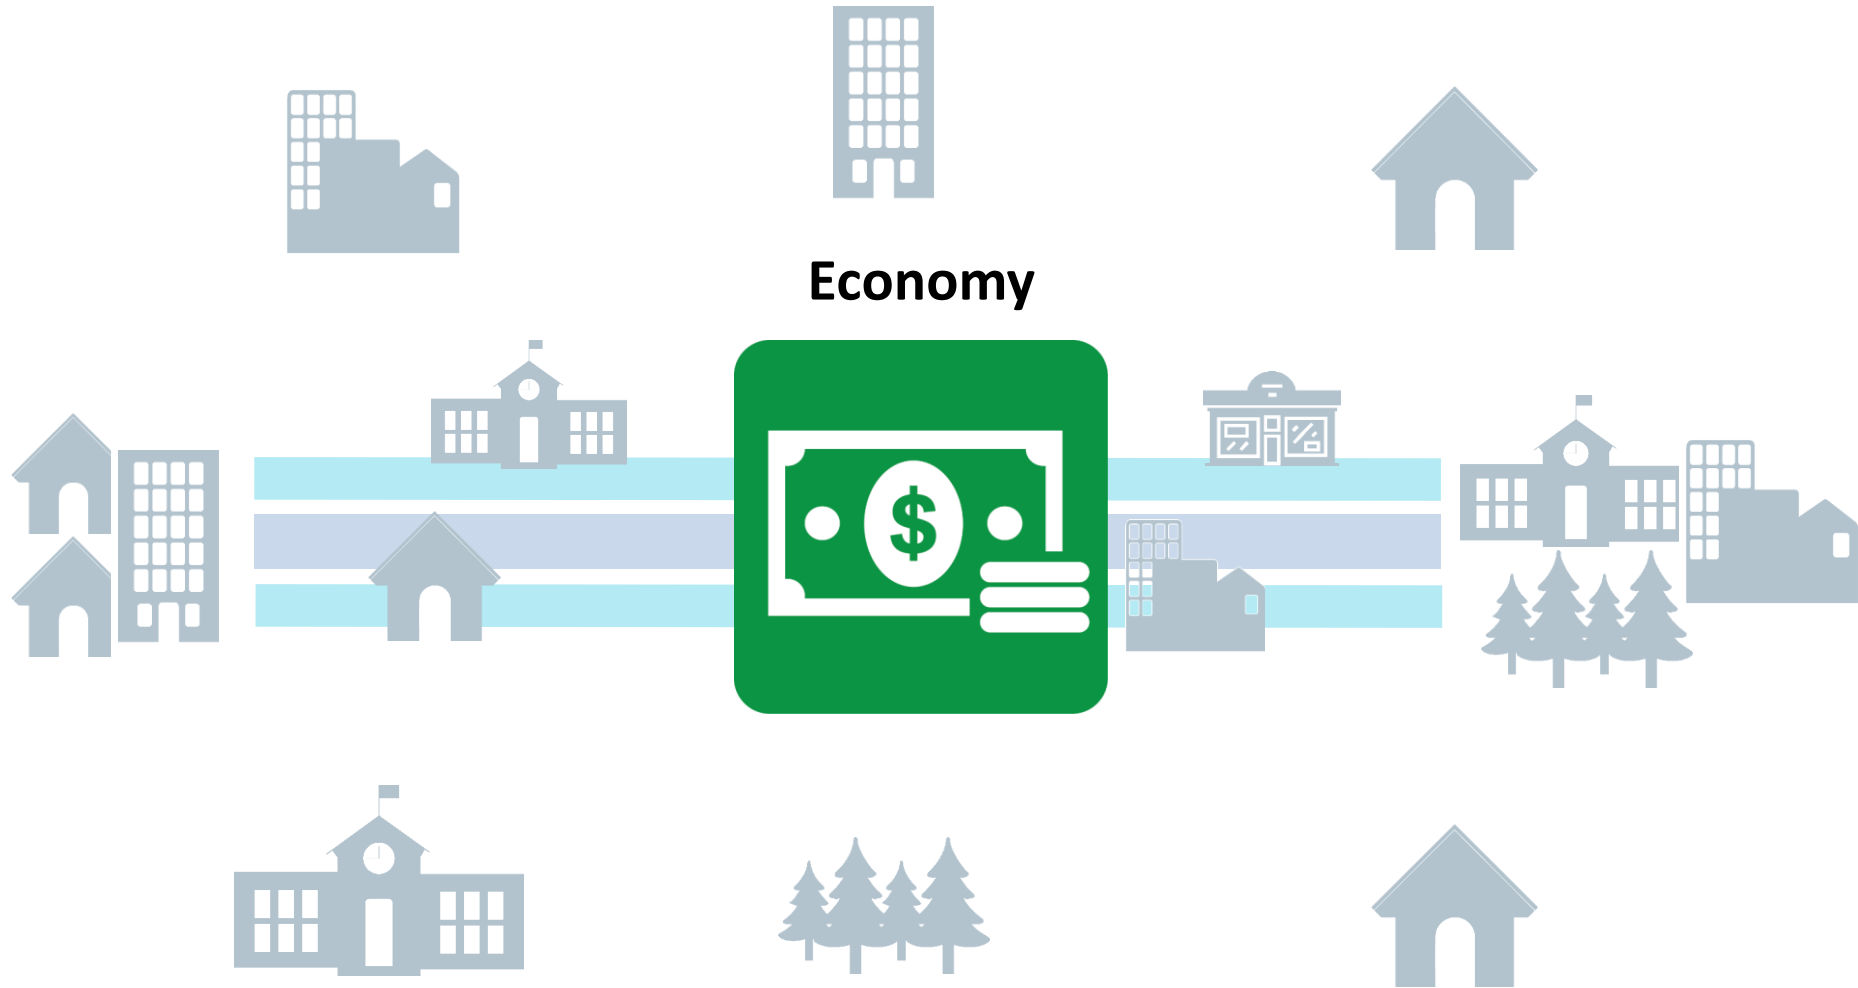

**Safety**

**Community livability**

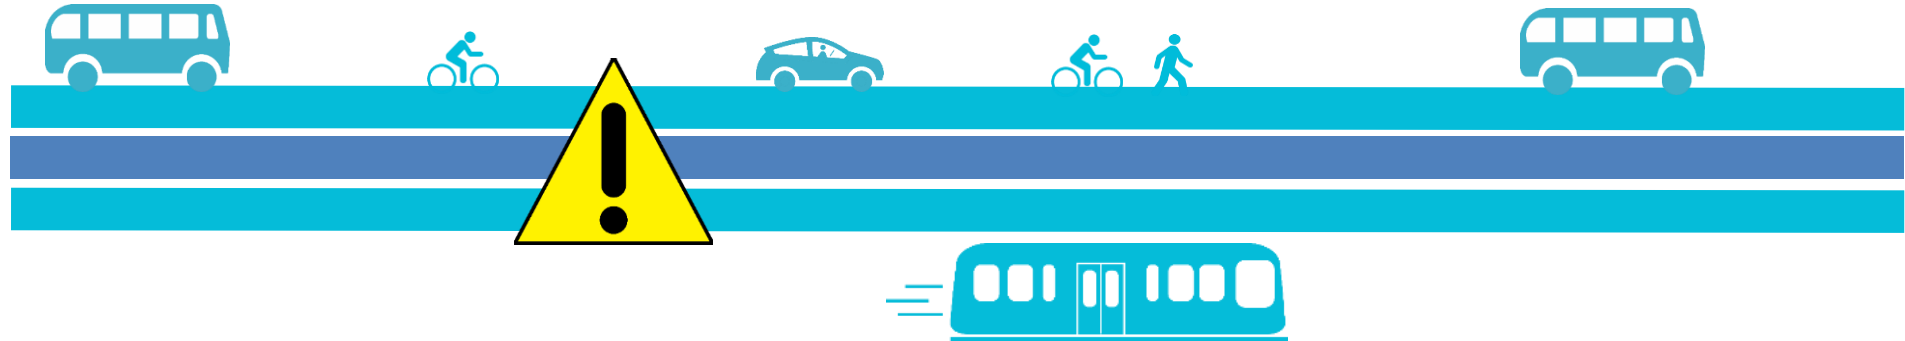

# Economy

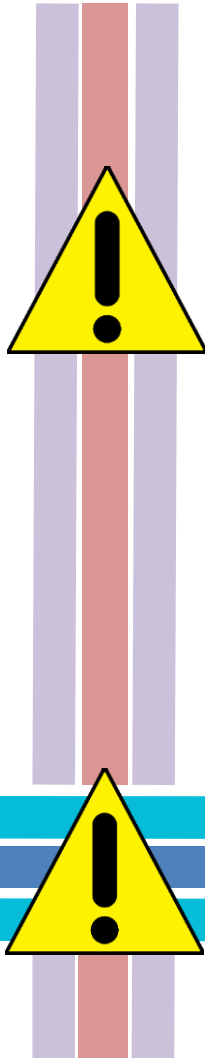

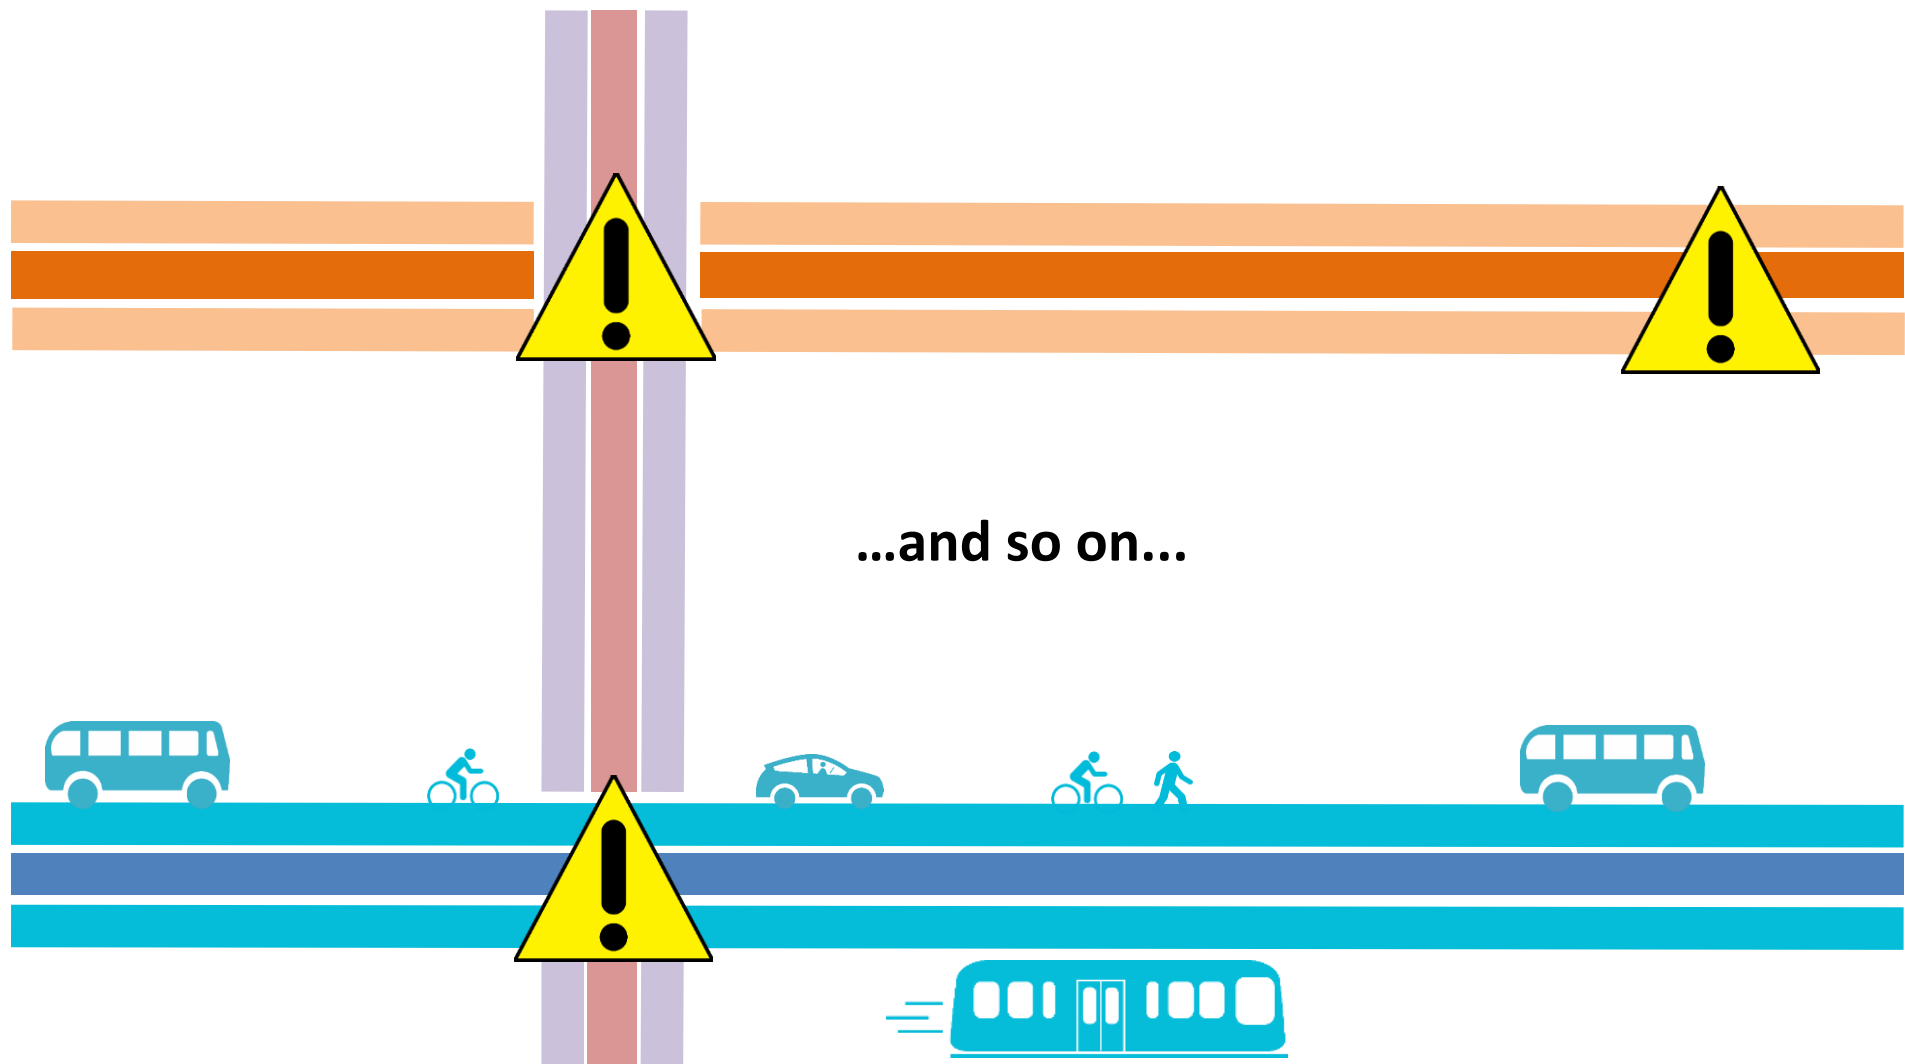

**An issue in one corridor...**

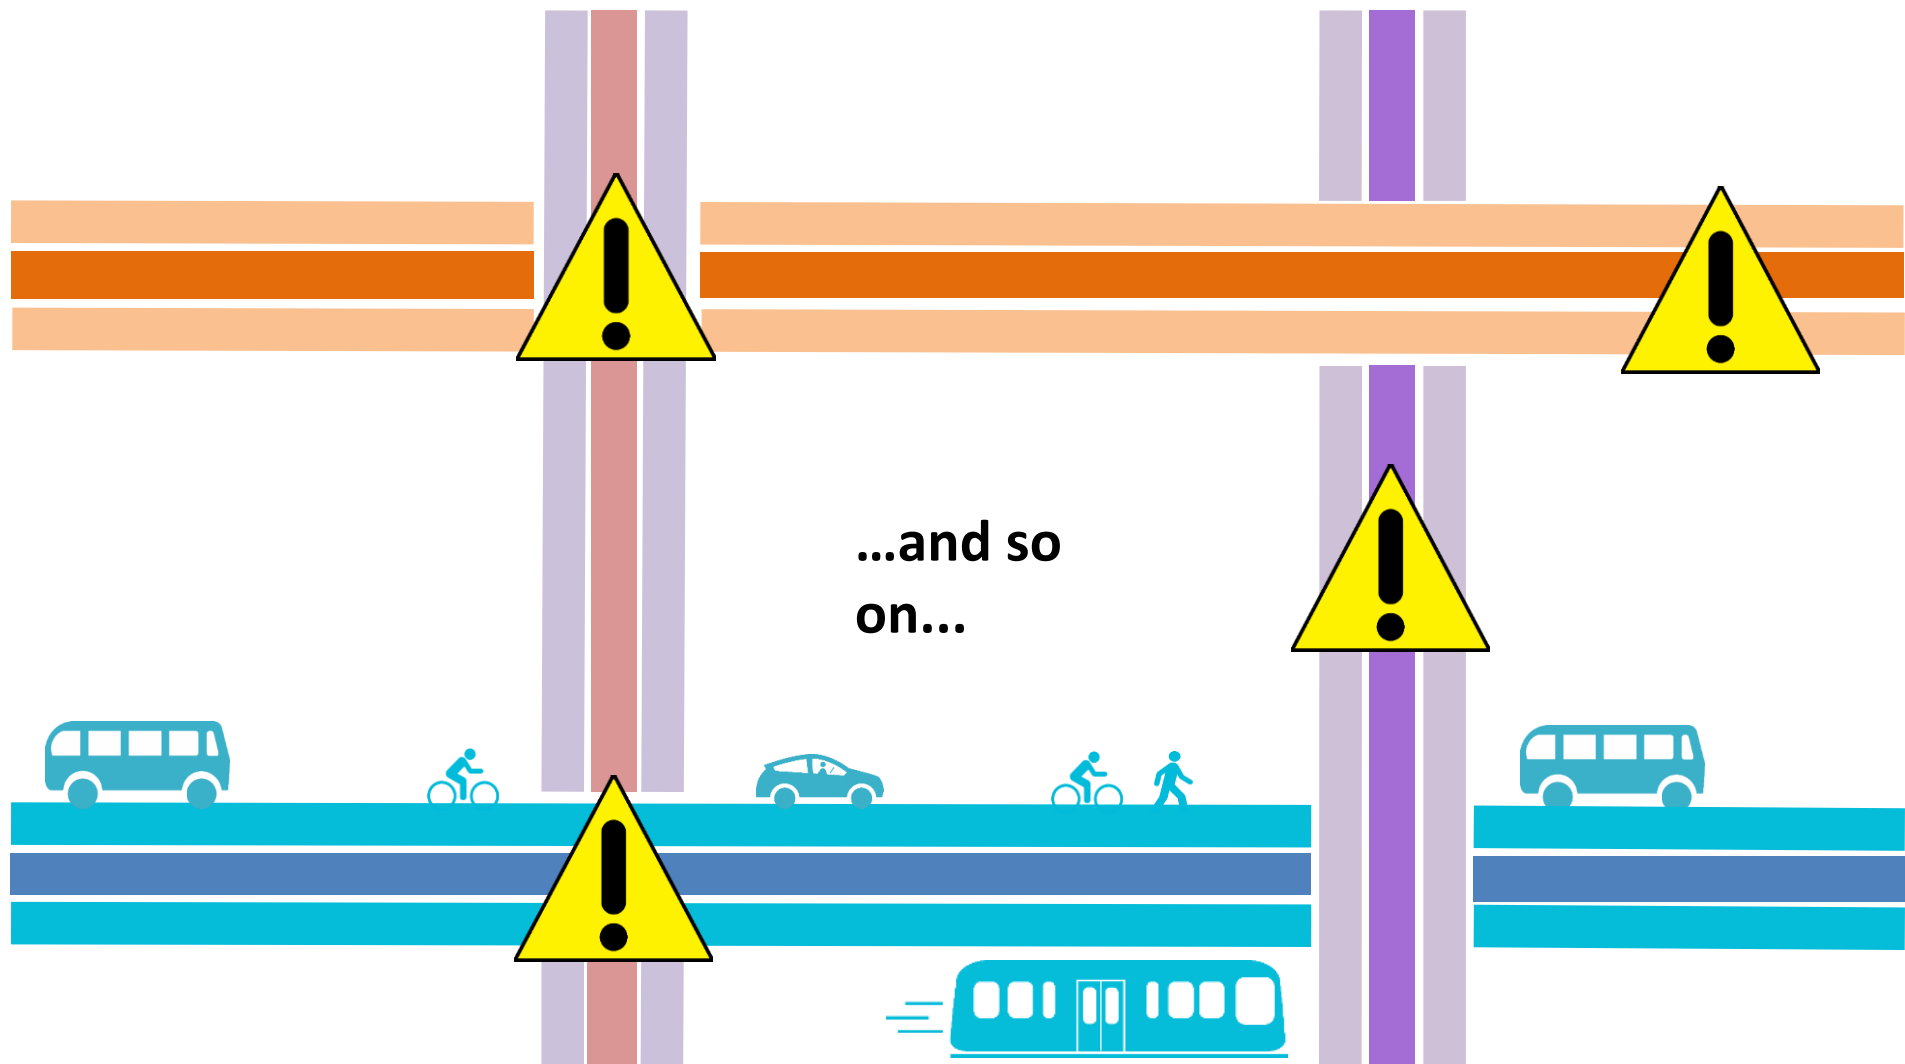

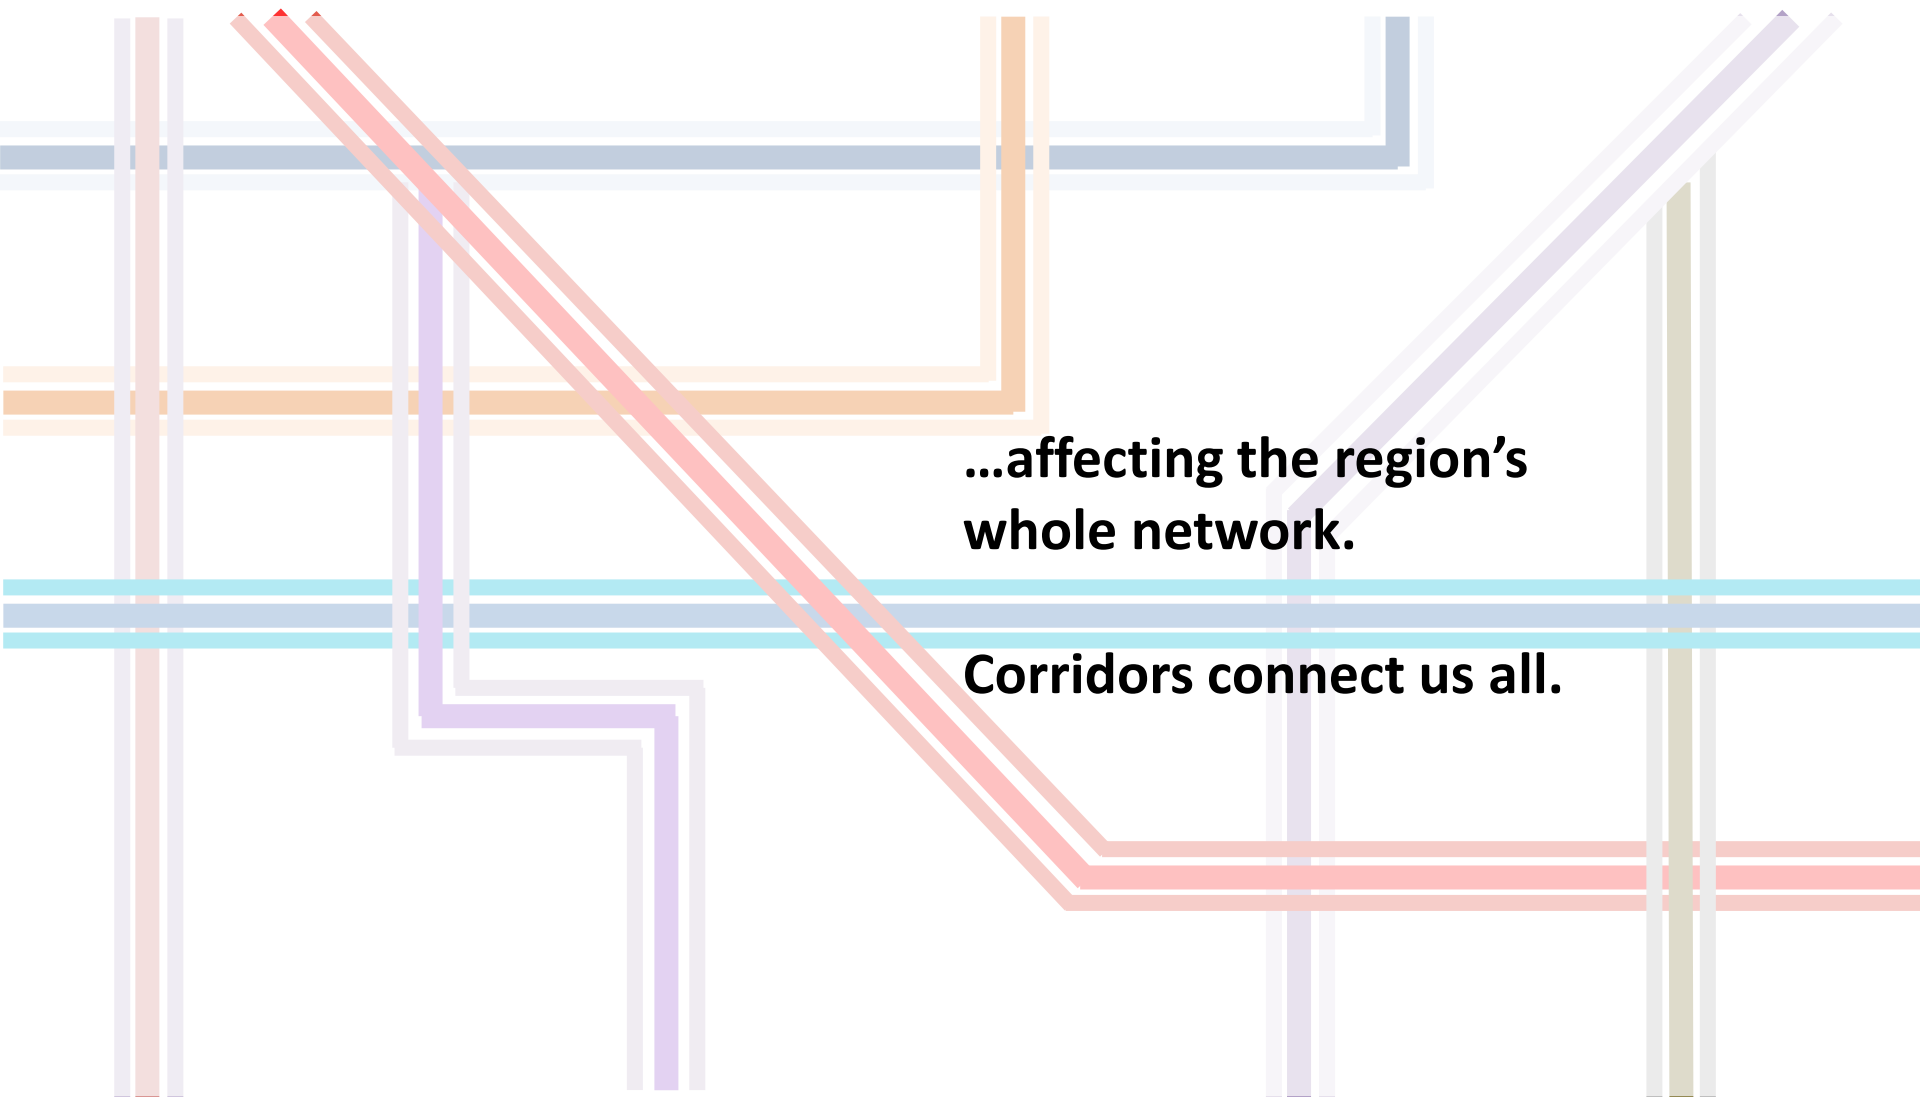

**...can impact  
other corridors...**

**...affecting the region's  
whole network.**

**Corridors connect us all.**

# Corridors have needs... because people do.

Arrive on time

Travel safely

Access more  
opportunities

Have options

Take pride in  
community
