

I-5 Rose Quarter Project: Values, Outcomes, and Actions

Metro Council's support for the I-5 Rose Quarter Project is contingent on a clear commitment from the Oregon Transportation Commission to the outcomes listed below. This document will guide all Metro decisions and review of future funding requests for the project.

Value: Advancing racial equity and committing to restorative justice

OUTCOMES

- Institutional leadership demonstrates an explicit commitment to restorative justice.
- A community-led visioning process elevates the voices of and benefits historically harmed and marginalized communities.
- Connectivity within neighborhoods and to job centers is increased, air quality and noise are improved, and active, safe, and usable spaces are created in the Albina community.
- Community stability and value are restored and pathways are paved for wealth generation in the Albina community in both the short and long-term.
- The wealth that was taken from the historic Albina community due to the construction of I-5 is recognized and the impacts of development of the Moda Center, Coliseum, and Convention Center are acknowledged.
- Disadvantaged Business Enterprise (DBE) opportunities are maximized at every phase of the construction project to gain jobs and address specific minority contracting needs in Portland.

ACTIONS REQUESTED

- Coordinate with the Albina Vision Community Investment plan (funded by a Metro grant) to take into account the land value created by this project and the urban design features described in the Albina Vision.
- Appoint a landscape design team to inform a community-led decision-making process on highway cover design.
- Set a new standard for State design and contracting practices for local minority-owned contractors and small businesses that incorporates prime-contractor development programs, workforce development opportunities, anti-displacement and restorative community building investment, and wealth creation and land ownership opportunities.
- Establish a committee to oversee implementation of the DBE contracting process.

Value: Increase multi-modal mobility and implement congestion pricing to reduce greenhouse gas emissions

OUTCOMES

- Congestion pricing is implemented as part of the project to both manage transportation demand and traffic, and generate revenue while maximizing limited transportation funding resources
- A more efficient transportation system is achieved that improves traffic flow of the highway and improves and increases multi-modal mobility in the project area.
- Economic growth is enhanced by capitalizing on opportunities for supporting goods movement reliability within the statewide network.

- A complete project that incorporates highway lid designs realizing the vision set forth by the Albina Trust, improving development opportunities in the community, and enhancing connectivity of the local street network, particularly for transit, bicycle, and pedestrian users.
- Air quality is improved and impacts to human health are minimized in the project area, particularly for communities of color disproportionately impacted by air toxins.

ACTIONS REQUESTED

- Synchronize the project timeline with the I-5 tolling program, so that any analysis of traffic and greenhouse gas emission benefits of the project also incorporates pricing strategies for managing traffic.
- Link the project with larger I-5 corridor planning efforts by taking into account the transportation needs of the entire corridor, as well as the potential impacts to people living along the entire I-5 corridor.
- Implement congestion pricing on this segment of I-5 as soon as possible and prior to completing the project.

Value: Engaging stakeholders through a transparent and inclusionary decision-making process

OUTCOMES

- People with diverse backgrounds and expertise are brought together in local community spaces through engagement that is creative, intentional, and fosters community building.
- Engagement efforts reach out to communities to foster a two-way dialogue that demonstrates how those conversations meaningfully inform decision making.
- The process is community-led and supported by a clearly defined governance structure that is responsive to information, feedback, and insight gained through engagement.
- All stages of the process reflect the shared power of the community and local, regional, and state government to influence project decisions and outcomes, ensuring there is consensus on the scope and that the project ultimately meets needs at every scale.
- Communication and collaboration with interagency partners is clear, consistent, and predictable, and there is demonstrated alignment regarding and accountability for project outcomes.

ACTIONS REQUESTED

Additional potential actions requested from ODOT toward furthering this outcome:

- Provide more detail about the roles and expected deliverables of the Community Advisory Committee (CAC) and Executive Steering Committee (ESC), as well as how committee feedback will be incorporated into project timelines and milestones.
- Clearly define how feedback mechanisms will function between the CAC, ESC, participating agencies, ODOT staff, and the Oregon Transportation Commission (OTC).
- Clearly describe to agency partners how the OTC's 11 actions will be incorporated into the project and have timelines synchronized in a way that ensures transparency and accountability.
- Develop a partner agency agreement (e.g., IGA, MOU) that outlines how collaboration will continue as part of a process that incorporates these outcomes, completes these identified actions, and commits to project principles and values.
